

The ME One ZIP table contains six fields: orgid, chiacarrierspecificuniquememberid, calendaryear, submissionyearmonth, zipcode, and state. The **MC table** (see Figure 1) links to the membereligibility (ME) one ZIP code per year table by linkorgidme, chiacarrierspecificuniquememberid, and dateofservicefromyear fields, as does the **DC table** (see Figure 2). The **PC table** (see Figure 3) links to the ME one ZIP code per year table by linkorgidme, chiacarrierspecificuniquememberid, and dateprescriptionfilledyear fields. State codes outside New England geographic boundaries are represented by a hash character in the state field (see Table 1).
