Summary

Enrollment Trends monitors health insurance coverage in the Commonwealth of Massachusetts, where coverage is defined by unique Massachusetts residents with primary, medical membership in the top 14 commercial payers*, MassHealth (Medicaid), and Medicare. Membership counts are sourced from the Massachusetts All-Payer Claims Database (MA APCD) using payer-verified logic and supplemented, where necessary, with data provided directly by commercial payers and state or federal agencies. A list of included payers is on page 2. Shown counts represent the most current and accurate data available. More information on the methods and data sources used in this report can be found in the technical appendix.

Enrollment Trends should not be used to calculate a Massachusetts uninsured rate. Counts exclude smaller payers and third party administrators, those with primary medical coverage through the VA or TRICARE, and those receiving coverage through other, smaller programs. Counts may also not be completely unique across commercial and/or public payers. CHIA’s population-based Massachusetts Health Insurance Survey found a 96.4% insurance rate among residents in mid-2014.

Enrollment Trends is a recurring report released every six months. This edition includes enrollment data from March 2014 through September 2015. This report is accompanied by a databook, technical appendix, and MA APCD programming code. The databook includes additional population breakouts—including gender, age group, and county—not included in the report.

For questions on Enrollment Trends, please contact Ashley Storms, Senior Health System Policy Analyst, at (617) 701-8269 or at ashley.storms@state.ma.us.

*Two payer entities that were previously reported separately are now combined with their parent companies for Enrollment Trends. Data for Health Plans, Inc. are reported within Harvard Pilgrim Health Care, and data for Network Health are reported within Tufts Health Plan.

**Medicare**
15. Medicare Enrollment

16. **Glossary of Terms**
Four million Massachusetts residents received their primary, medical health insurance coverage through private commercial insurance from March 2014 to September 2015. This included enrollees receiving coverage through an employer, purchasing it directly from a payer, or purchasing it through the Massachusetts Health Connector. Medicare and MassHealth (Medicaid) each provided primary, medical coverage for more than a million Massachusetts residents.

This report will review enrollment trends in each of these areas separately.

Total Massachusetts Enrollment
March 2014 — September 2015

Enrollment Trends should not be used to calculate a Massachusetts uninsurance rate. For information on uninsurance in the Commonwealth, see CHIA’s 2015 Massachusetts Health Insurance Survey.

Source: MA APCD, supplemental payer data, MassHealth, Massachusetts Health Connector, CMS

Graphic Notes: Enrollment Trends counts are not exhaustive for the Massachusetts market, potentially excluding members of smaller payers and third-party administrators, Veterans Affairs, TRICARE, and other minor coverage sources. Counts may also not be completely unique across commercial and/or public payers. “CommCare + MSP” refers to Commonwealth Care and the Medical Security Program. Medicare Advantage counts exclude enrollment in Senior Care Options, One Care, and the Program of All-Inclusive Care for the Elderly (PACE), which are included under MassHealth counts here; Medicare Fee-For-Service dual-eligibles remain in Medicare counts. See technical appendix for more information on the treatment of dual-eligibles in this report.
Beginning in January 2014, the implementation of the Affordable Care Act (ACA) in Massachusetts expanded eligibility for MassHealth coverage and shifted membership between public and private categories. Between September 2014 and September 2015, three Massachusetts public programs closed (MassHealth Transitional, Commonwealth Care, and the Medical Security Program). Enrollment increased in alternative sources of coverage at MassHealth, in “private” subsidized Qualified Health Plan offerings at the Massachusetts Health Connector, and in unsubsidized private commercial coverage.

Source: MA APCD, supplemental payer data, MassHealth, Massachusetts Health Connector, CMS
Graphic Notes: “CommCare + MSP” refers to Commonwealth Care and the Medical Security Program. Medicare Advantage counts exclude enrollment in Senior Care Options, One Care, and the Program of All-Inclusive Care for the Elderly (PACE), which are included in MassHealth counts here; Medicare Fee-For-Service dual-eligibles are included in Medicare counts. See technical appendix for more information on the treatment of dual-eligibles in this report. Enrollment Trends counts are not exhaustive for the Massachusetts market, potentially excluding members of smaller payers and third-party administrators, Veterans Affairs, TRICARE, and other minor coverage sources. Counts may also not be completely unique across commercial and/or public programs.
Approximately 45% of Massachusetts public coverage was administered by commercial payers in September 2015. BCBSMA administered coverage for one in four Massachusetts residents in September 2015, more than any other public (MassHealth, Medicare) or private payer. Partners-owned NHP, which was Massachusetts’s fastest growing commercial payer during the preceding year, ended September 2015 as the Commonwealth’s fourth-largest commercial payer. NHP had significant membership gains across both its commercial and MassHealth Managed Care Organization (MCO) lines of business.

Source: MA APCD, supplemental payer data, CMS

Graphic Notes: Data for Health Plans Inc. are included under its parent company, Harvard Pilgrim Health Care. Data for Network Health are included under its parent company, Tufts Health Plan. Medicare Advantage counts exclude enrollment in Senior Care Options, One Care, and the Program of All-Inclusive Care for the Elderly (PACE). See technical appendix for more information on the treatment of dual-eligibles in this report. Enrollment Trends counts are not exhaustive for the Massachusetts market, potentially excluding members of smaller payers and third-party administrators, Veterans Affairs, TRICARE, and other minor coverage sources.
In September 2015, two-thirds of Massachusetts private commercial members were enrolled in either BCBSMA, HPHC, or Tufts plans. While a majority of Massachusetts members remained covered by self-insured plans, the percentage of fully-insured members increased from September 2014 to September 2015 due to increases in fully-insured Qualified Health Plan enrollment. More than 4 in 10 Massachusetts private commercial members continued to be enrolled in an HMO product in September 2015. Approximately 73% of HMO members were covered under fully-insured plans compared to just 26% of PPO members (see databook).
From September 2014 to September 2015, Massachusetts POS membership increased by 33%. The Group Insurance Commission (GIC) contributed to this increase as it converted two large PPO plans to POS plans in July 2015. The GIC expects to save $18 million by introducing POS-plan primary care provider (PCP) requirements.

HMO membership increased 5% over the same period, driven by increased Qualified Health Plan enrollment (mainly HMO products).

Product Types:

- **Health Maintenance Organization (HMO):** Managed care plans with a closed network of providers; generally require members to coordinate care through a PCP.
- **Preferred Provider Organization (PPO):** Plans with a network of preferred providers, although members may obtain care outside the preferred network at higher levels of cost-sharing; generally do not require members to select a PCP.
- **Exclusive Provider Organization (EPO):** Managed care plans with a closed network of providers; unlike an HMO, may not require care to be coordinated through a PCP.
- **Point of Service (POS):** Plans in which members pay less if they use in-network doctors, hospitals, and other health care providers. POS plans also require referrals from PCPs in order to see specialists.
- **Indemnity:** Plans that offer broad access to licensed medical providers and provide reimbursements to patients and/or providers as expenses are incurred.

Source: MA APCD, supplemental payer data
Graphic Notes: “Other” includes plans that were not identified by another product type shown.

---

3. Payers select members’ product type as part of MA APCD submissions.
Fifty-six percent of Massachusetts’s private commercial enrollees were self-insured in September 2015, down one percentage point from the previous year. This increase may reflect the influx of new fully-insured Qualified Health Plan enrollees to the market through the Massachusetts Health Connector.

Private Commercial Enrollment by Payer and Funding Type
September 2015

Source: MA APCD, supplemental payer data

Graphic Notes: Data for Health Plans Inc. are included under its parent company, Harvard Pilgrim Health Care. Data for Network Health are included under its parent company, Tufts Health Plan.
In general, the larger the employer, the more likely it is to self-insure. In September 2015, 8 in 10 members receiving coverage through an employer with more than 500 employees were covered under a self-insured arrangement. However, nearly all members in the Massachusetts merged market (individual and small group sectors) were enrolled in fully-insured plans.

Private Commercial Enrollment by Market Sector and Funding Type

September 2015

Market Sectors (Employer or Group Size)

- **Individual:** Individual contract with payer; includes individual purchases through the Massachusetts Health Connector
- **Small Group:** Employer groups with 1-50 employees
- **Mid-Size Group:** Employer groups with 51-100 employees
- **Large Group:** Employer groups with 101-500 employees
- **Jumbo Group:** Employer groups with more than 500 employees

Source: MA APCD, supplemental payer data

Graphic Notes: “Other” includes members whose market sector was not differentiated in the data. Many of these members are federal employees (fully-insured) or “host members” with contracts issued in other states. Employers offering multi-state plans are likely large or jumbo group employers. MA APCD submissions do not track individual market sector changes over time. See technical appendix for details.
Following functional limitations of the Commonwealth’s Health Insurance Exchange to process applications in 2014, individual Health Connector Qualified Health Plan enrollment increased to more than 173,000 members by September 2015. Three-quarters of these members were enrolled in subsidized ConnectorCare plans, which combine premium tax credits and cost-sharing subsidies to make private commercial insurance more affordable for low- and moderate-income Massachusetts residents.

The Health Connector also enrolled approximately 5,760 members in small group coverage by September 2015 (not shown).

Massachusetts Health Connector Individual QHP Enrollment
March 2014 — September 2015

Qualified Health Plan (QHP): A health plan certified by the Massachusetts Health Connector to meet benefit and cost-sharing standards.

ConnectorCare: A set of subsidized QHPs offering members reduced monthly premiums and cost-sharing, based on income eligibility.

Advanced Premium Tax Credits (APTC): Federal tax credits which may be paid in advance to reduce monthly premiums for qualifying QHP members.

Source: Massachusetts Health Connector

Graphic Notes: Does not include Health Connector small group enrollment, which ranged from 4,400 to 6,700 over the March 2014 to September 2015 period. Individuals who are American Indian or Alaska Native may qualify for additional cost-sharing reductions; more information is available from the Massachusetts Health Connector. Plan type information was unavailable for three members in September 2015; these members remain in shown totals.
Ten Massachusetts payers offered Qualified Health Plans (QHPs) through the Health Connector in 2015. Tufts (Network Health), NHP, BMCHP, and HPHC had the largest individual QHP enrollment gains from September 2014 to September 2015. Tufts (Network Health) had Massachusetts's largest individual QHP enrollment in September 2015.

The Health Connector also enrolled approximately 5,760 members in small group coverage by September 2015.

Source: Massachusetts Health Connector

Graphic Notes: Network Health is included under its parent company, Tufts Health Plan. Does not include Health Connector small group enrollment, which ranged from 4,400 to 6,700 over the March 2014 to September 2015 period.
MassHealth and Other Massachusetts Public Program Enrollment
September 2013 — September 2015
1.33 Million Primary, Medical Members (-14% since September 2014)

Subsidized Private Commercial

Commonwealth Care & Medical Security Program

MassHealth Fee-for-Service (FFS)

MassHealth Managed Care Organization (MCO) Plan

MassHealth Primary Care Clinician (PCC) Plan

*Not included in shown 1.33 million total

Source: MA APCD, Massachusetts Health Connector, MassHealth

Graphic Notes: Enrollment shown only for members with primary coverage. The majority of members in the FFS population have other forms of insurance and are not included. Members in Senior Care Options, One Care, and PACE are not included. Subsidized private commercial coverage, while not classified as a public program, is partially supported by public funds. CommCare and MSP enrollment was sourced from the Massachusetts Health Connector for 2013 and from the MA APCD for 2014-2015.

Massachusetts’s second ACA Open Enrollment period (December 2014 - February 2015) coincided with the closure of several public coverage programs: the temporary MassHealth Transitional program, Commonwealth Care (CommCare), and the Medical Security Program (MSP). As these programs ended, membership increased in other coverage programs within MassHealth (particularly its MCO CarePlus program) and in subsidized private insurance, as available through the Massachusetts Health Connector. Overall MassHealth and other Massachusetts public program enrollment declined (-14%) from September 2014 to September 2015 as these transitions occurred.

Commonwealth Care (CommCare): A state program that provided coverage to low- and moderate-income Massachusetts residents.

Medical Security Program (MSP): A state program that provided coverage to Massachusetts residents receiving unemployment benefits.

MassHealth Delivery Systems

Fee-for-Service (FFS): MassHealth members who receive services through MassHealth on a fee-for-service basis.

Managed Care Organization (MCO): A commercial health plan that contracts with MassHealth to manage the care of MassHealth members.

Primary Care Clinician (PCC) Plan: A MassHealth-administered managed care option with services coordinated through a primary care clinician.

See MassHealth’s website for more detailed definitions.

*Not included in shown 1.33 million total

Source: MA APCD, Massachusetts Health Connector, MassHealth

Graphic Notes: Enrollment shown only for members with primary coverage. The majority of members in the FFS population have other forms of insurance and are not included. Members in Senior Care Options, One Care, and PACE are not included. Subsidized private commercial coverage, while not classified as a public program, is partially supported by public funds. CommCare and MSP enrollment was sourced from the Massachusetts Health Connector for 2013 and from the MA APCD for 2014-2015.
In September 2015, approximately 1.3 million Massachusetts residents relied on MassHealth for their primary, medical coverage. MassHealth provided support to another 500,000 residents to obtain coverage through other sources (Partial/Secondary). CHIA will release additional information on MassHealth later this year.

MassHealth Enrollment by Delivery System
September 2015

Direct Coverage: Primary, medical coverage provided by MassHealth.
Partial/Secondary Coverage: Coverage provided by MassHealth for a limited range of "wrap" services or to support the obtainment of primary, medical coverage from an alternate source.

MassHealth Delivery Systems
Fee-for-Service (FFS): MassHealth members who receive services through MassHealth on a fee-for-service basis.
Managed Care Organization (MCO): A commercial health plan that contracts with MassHealth to manage the care of MassHealth members.
Primary Care Clinician (PCC) Plan: A MassHealth-administered managed care option with services coordinated through a primary care clinician.
Senior Care Options (SCO), One Care, Program of All-Inclusive Care for the Elderly (PACE): Specialized managed care programs for individuals with both MassHealth and Medicare coverage.

Source: MA APCD, MassHealth, CMS
Graphic Notes: MassHealth “Direct” includes only members with primary, medical coverage through MassHealth. Members in Senior Care Options, One Care, and PACE are shown under Partial/Secondary. The majority of members in the FFS populations have other forms of insurance.
More than a million Massachusetts residents received their primary, medical insurance coverage from Medicare in 2015. Approximately 81% of Massachusetts Medicare beneficiaries (see Graphic Notes) were enrolled in traditional Medicare Fee-for-Service (FFS) in September 2015; the remainder were enrolled in Medicare Advantage, a managed care option administered by commercial payers. Medicare Advantage membership grew by 4.5% from September 2014 to September 2015; Medicare FFS membership grew by 2.1%.

Medicare Delivery Systems
Medicare Fee-for-Service (FFS): Sometimes called traditional or original Medicare, FFS allows beneficiaries to obtain care from providers that accept Medicare coverage. Medicare FFS counts, as shown here, are comprised of enrollees with both Part A (inpatient coverage) and Part B (outpatient coverage) coverage. (See technical appendix for more detail.)

Medicare Advantage: Sometimes called Medicare Part C, Medicare Advantage is a managed care plan offered by commercial payers to provide beneficiaries with Part A and Part B benefits, sometimes including prescription drug benefits (Part D). Most Medicare services are covered through the plan and are not paid for under Medicare FFS.

See CMS’s website for more detailed definitions.

Medicare Enrollment
September 2014 — September 2015
1.06 Million Primary, Medical Members (+3% since September 2014)

Source: MA APCD, CMS
Graphic Notes: Medicare Advantage counts do not include Senior Care Options, OneCare, and PACE members. These counts are shown in databook. Medicare Fee-for-Service includes only beneficiaries with both Part A and Part B coverage.
Glossary of Terms

**Advanced Premium Tax Credits (APTC):** Federal tax credits which may be paid in advance to reduce monthly premiums for qualifying QHP members.

**Commonwealth Care (CommCare):** A state program that provided coverage to low- and moderate-income Massachusetts residents.

**ConnectorCare:** A set of subsidized qualified health plans offering members reduced monthly premiums and cost-sharing, based on income eligibility.

**Exclusive Provider Organization (EPO):** Managed care plans with a closed network of providers; unlike a health maintenance organization, may not require care to be coordinated through a PCP.

**Fully-Insured:** A fully-insured employer contracts with a payer to cover pre-specified medical costs for its employees and employee-dependents.

**Health Maintenance Organization (HMO) Plan:** Managed care plans with a closed network of providers; generally require members to coordinate care through a PCP.

**Indemnity Plan:** Plans that offer broad access to licensed medical providers and provide reimbursements to patients and/or providers as expenses are incurred.

**Market Sectors:** Employer or group size
- **Individual:** Individual contract with payer; includes individual purchases through the Massachusetts Health Connector
- **Small Group:** Employer groups with 1-50 employees
- **Mid-Size Group:** Employer groups with 51-100 employees
- **Large Group:** Employer groups with 101-500 employees
- **Jumbo Group:** Employer groups with more than 500 employees

**MassHealth Direct Coverage:** Primary, medical coverage provided by MassHealth.

**MassHealth Fee-For-Service (FFS):** MassHealth members who receive services through MassHealth on a fee-for-service basis.

**MassHealth Managed Care Organization (MCO):** A commercial health plan that contracts with MassHealth to manage the care of MassHealth members.

**MassHealth Partial/Secondary Coverage:** Coverage provided by MassHealth for a limited range of services or as a secondary payer.

**MassHealth Primary Care Clinician (PCC) Plan:** A MassHealth-administered managed care option with services coordinated through a primary care clinician.

**Medical Security Program (MSP):** A state program that provided coverage to Massachusetts residents receiving unemployment benefits.

**Medicare Advantage:** Sometimes called Medicare Part C, Medicare Advantage is a managed care plan offered by commercial payers to provide beneficiaries with Part A and Part B benefits, sometimes including prescription drug benefits (Part D). Most Medicare services are covered through the plan and are not paid for under Medicare FFS.

**Medicare Fee-For-Service (FFS):** Sometimes called traditional or original Medicare, FFS allows beneficiaries to obtain care from providers that accept Medicare coverage. Medicare FFS counts are comprised of enrollees with both Part A (inpatient coverage) and Part B (outpatient coverage) coverage.

**Point of Service (POS) Plan:** Plans in which members pay less if they use in-network doctors, hospitals, and other health care providers. POS plans also require referrals from PCPs in order to see specialists.
Preferred Provider Organization (PPO) Plan: Plans with a network of preferred providers, although members may obtain care outside the preferred network at higher levels of cost-sharing; generally do not require members to select a PCP.

Qualified Health Plan (QHP): A health plan certified by the Massachusetts Health Connector to meet benefit and cost-sharing standards.

Self-Insured: A self-insured employer is financially responsible for its employees and employee dependents' medical costs, contracting with payers or third party administrators to administer their claims.

Senior Care Options (SCO), One Care, Program of All-Inclusive Care for the Elderly (PACE): Specialized managed care programs for individuals with both MassHealth and Medicare coverage.
