

CHIA Standard Statistics: Commercial Health Insurance Benefit Levels (Actuarial Values)

Time Period/Data Year(s): CY2011 – CY2016

Governing Legislation: M.G.L. c. 12C, section 10; Regulation 957 CMR 10.00

<p>Description</p>	<p>CHIA’s Benefit Level statistic measures the proportion of medical claim costs covered by payers for primary medical health insurance plans in the Massachusetts commercial market. Benefit levels are measured by actuarial value, estimated from the paid-to-allowed claims ratio adjusted for the impact of induced demand related to cost-sharing levels. Calculated benefit levels reflect payer liability for covered medical and pharmacy claims—excluding any cost-sharing reduction subsidies that may have lowered out-of-pocket costs for qualifying members purchasing individual plans through the Massachusetts Health Connector.</p>
<p>Frequency</p>	<p>Benefit level data is collected as part of the Annual Premiums Data Request, which is released each February, with data submissions requested by mid-/late-May.</p>
<p>Statutory Definition</p>	<p>CHIA is directed by M.G.L. c. 12C, section 10 to report on “changes in the benefit and cost-sharing design of plans.” Data collection requirements are outlined by regulation 957 CMR 10.00.</p>
<p>Data Submitters</p>	<p>Under 957 CMR 10.00, “[a] Payer is subject to the reporting requirements in 957 CMR 10.00 if the Payer, including Affiliated Payers, had at least 50,000 Massachusetts Private Commercial Plan members for the latest quarter as reported in the Center’s most recently published Enrollment Trends report as of February 1st of the Reporting Year and posted on the Center’s website. If a Payer is subject to the reporting requirements of 957 CMR 10.00, it shall file the required data for all of its Private Commercial Plans, clients, and Affiliated Payers.”</p>
<p>Data Included</p>	<p>As part of the Annual Premiums Data Request, payers submit aggregate data for their primary, medical, commercial Massachusetts contract-membership for the previous three calendar years. Submitted benefit level data - which relies upon submitted Allowed and Incurred Claims data and rating factor information - is broken out by funding type (fully-/self-insured), market sector (employer size), product type (HMO/PPO/POS)*, and benefit design type (High Deductible Health Plan/Limited Networks/Tiered Networks). Benefit level data is frequently paired with other financial data (e.g., premiums) for context on health plan “value.”</p> <p>* Starting with the 2017 analysis (CY2014-16 data), a POS (Point-of-Service) product type category was added to the data submission manual.</p>
<p>Quality Assurance Process</p>	<p>Data submitted as part of the Annual Premiums Data Request undergoes a quality assurance and verification process:</p> <p>Along with CHIA’s actuary, CHIA runs internal and external validity checks on all payer-submitted data. Internal validity checks are run on payer-submitted data for point-in-time and trend consistency and reasonableness. External checks are also run, comparing payer-submitted data against other payer-submitted state and federal reports, including the Supplemental Health Care Exhibit, the Massachusetts Annual Comprehensive Financial Statement, and the CCIIO Medical Loss Ratio Reporting Form. Where discrepancies are found and confirmed, CHIA requests revised data submissions from payers.</p>

CHIA Standard Statistics: Commercial Health Insurance Benefit Levels (Actuarial Values)

Reports	<p>Benefit level data are profiled in CHIA's</p> <ul style="list-style-type: none">• Annual Report on the Performance of the Massachusetts Health Care System (Released each August/September) <p>Reports include databooks, chartpacks, and technical appendices.</p>
Data Notes	<p>Important notes about data received from the Annual Premiums Data Request:</p> <ul style="list-style-type: none">• Massachusetts contract-membership includes non-Massachusetts residents.• Each year's Premium Request submissions include slight methodological refinements and the addition of several payers. See relevant technical appendices.
How to Obtain Data	<p>Most aggregate data from the Annual Premiums Data Request is published annually in databooks on CHIA's website concurrently with the reports noted above.</p>
Related CHIA Measures	<p>CHIA's average Cost-Sharing statistic measures the actual dollar amounts paid by members, while benefit levels track the percentage of claims dollars that payers cover, adjusted for various member and group factors.</p>
