Introduction

Access to timely, accurate, and relevant data is essential to improving quality, mitigating costs, and promoting transparency and efficiency in the health care delivery system. A valuable source of data can be found in health care claims.

Using its broad statutory authority to collect, store and maintain health care information in a payer and provider claims database pursuant to M.G.L. c. 12C, the Center for Health Information and Analysis (CHIA) has adopted regulations to collect medical, pharmacy, and dental claims as well as provider, product, and member eligibility information derived from fully-insured, self-insured (where allowed), Medicare, Medicaid and Supplemental Policy data, which CHIA stores in an comprehensive All Payer Claims Database (APCD). CHIA serves as the Commonwealth's primary hub for health care data and a primary source of health care analytics that support policy development.

To facilitate communication and collaboration, CHIA actively maintains a MA APCD website (<http://www.chiamass.gov/apcd-information-for-data-submitters/>) with resources that currently include the submission and release regulations, Administrative Bulletins, the technical submission guide with examples, and support documentation. These resources are periodically updated with materials and CHIA staff are dedicated to working with all affected submitters to ensure full compliance with the regulation.

Deleted:

While CHIA is committed to establishing and maintaining an APCD that promotes transparency, improves health care quality, and mitigates health care costs, we welcome your ongoing suggestions for revising reporting requirements that facilitate our shared goal of administrative simplification. If you have any questions regarding the regulations or technical specifications we encourage you to utilize the online resources and reach out to our staff for any further questions.

Thank you for your partnership with CHIA on the all payer claims database.

957 CMR 8.00: APCD and Case Mix Data Submission

957 CMR 8.00 governs the reporting requirements regarding health care data and information that health care Payers and Hospitals must submit pursuant to M.G.L. c. 12C in connection with the APCD and the Acute Hospital Case Mix and Charge Data Databases. The regulation establishes the data submission requirements for the health care claims data and health plan information that Payers must submit and the procedures and timeframe for submitting such health care data and information. CHIA collects data essential for the continued monitoring of health care cost trends, minimizes the duplication of data submissions by payers to state entities, and promotes administrative simplification among state entities in Massachusetts.

Except as specifically provided otherwise by CHIA or under Chapter 12C, claims data collected by CHIA for the APCD is not a public record under clause 26 of section 7 of chapter 4 or under chapter 66. No public disclosure of any health plan information or data

Deleted: 6.0

shall be made unless specifically authorized under 957 CMR 5.00. CHIA developed the data release procedures defined in CHIA regulations to ensure that the release of such data is in the public interest, as well as consistent with applicable Federal and State privacy and security laws.

Patient Identifying Information

No patient identifying information may be included in any fields not specifically instructed as such within the element name, description and submission guideline outlined in this document. Patient identifying information includes name, address, social security number and similar information by which the identity of a patient can be readily determined.

Acronyms Frequently Used

APCD – All-Payer Claims Database
CHIA – Center for Health Information and Analysis
CSO – Computer Services Organization
DBA – Delegated Benefit Administrator
DBM – Dental Benefit Manager
DOI – Division of Insurance
GIC – Group Insurance Commission
ID – Identification; Identifier
MA APCD – Massachusetts’ All-Payer Claims Database
NPI – National Provider Identifier
PBM – Pharmacy Benefit Manager
QA – Quality Assurance
RA – Risk Adjustment; Risk Adjuster
TME / RP – Total Medical Expense / Relative Pricing
TPA – Third Party Administrator

The File Types:

DC – Dental Claims
MC – Medical Claims
ME – Member Eligibility
PC – Pharmacy Claims
PR – Product File
PV – Provider File
BP – Benefit Plan Control Total File

Deleted: SD – Supplemental Diagnosis Code File
(Connector Risk Adjustment plans only)

Deleted: 6.0

The MA APCD Monthly Pharmacy Claims File

Below we have provided details on business rules, data definitions and the potential uses of this data.

Specification Question	Clarification	Rationale
What is the frequency of submission?	Pharmacy claims files are to be submitted monthly <u>by the last day of the month</u> .	CHIA requires this frequency to maintain a current dataset for analysis.
What is the format of the file?	Each submission must be a variable field length asterisk delimited file.	An asterisk cannot be used within an element in lieu of another character. Example: if the file includes “Smith*Jones” in the Last Name, the system will read an incorrect number of elements and drop the file.
What does each row in the file represent?	Each row represents a claim line, typically a prescription.	It is necessary to obtain claim line item data to make sure each prescription is captured.
Are denied claims to be reported?	No. Wholly denied prescription claims should not be reported at this time. If for some reason a prescription has multiple claim lines and the claim pays but a line in that claim denies, all claim lines should be sent, similar to the denied claim line philosophy used in medical claims.	Denied line items of an adjudicated claim aid with utilization analysis.

Deleted: 6.0

Specification Question	Clarification	Rationale
Should previously paid but now Voided claims be reported?	Yes. Claims that were paid and reported in one period and voided by either the Provider or the Carrier should be reported in the next file. See PC110 below.	The reporting of Zero Paid Pharmacy Claims aids with the analysis of services utilized, Member Eligibility and deductibles applied.
What types of claims are to be included?	The Pharmacy Claims file is used to report any pharmacy claim sent to and paid by the Carrier/PBM.	CHIA has adopted the most widely used specification at this time to allow for comprehensive analysis.
The word 'Member' is used in the specification. Are 'Member' and 'Patient' used synonymously?	Yes. Member and Patient are to be used in the same manner in this specification	Member is used in the claim specification to strengthen the reporting bond between Member Eligibility and the pharmacy claims attached to a Member.
If claims are processed by a third-party administrator, who is responsible for submitting the data and how should the data be submitted?	In instances where more than one entity administers a health plan, the health care carrier and third-party administrators are responsible for submitting data according to the specifications and format defined in the Submission Guides. CHIA expects each party to report the Organization ID of the other party in the Delegated Benefit Organization ID (PC072) field to assist in linkage between the health care carrier and the third party administrator.	CHIA's objective is to create a comprehensive database that must include data from all health care carriers and all their vendors (TPAs, PBMs, DBAs, CSOs, etc.) to complete the view of the health service delivery system.

Deleted: 6.0

Types of Data collected in the Pharmacy Claim File

Submitter-Assigned Identifiers

CHIA requires various Submitter-assigned identifiers for matching-logic to the other files, including the Product and Member Eligibility files. Some examples of these elements include PC003, PC006, PC107 and PC108. These elements will be used by CHIA to aid with the matching algorithm to those other files. This matching allows for data aggregation and required reporting.

Claims Data

CHIA requires the line-level detail of all Pharmacy Claims for analysis. The line-level data aids with understanding utilization within products across submitters. The specific pharmacy data reported in PC026 through PC035, PC037 through PC039, PC057, PC058, PC060, PC064, PC071, and PC073 through PC075 would be the same or similar elements that are reported to a Carrier or TPA on the NCPDP Format or a Carrier specific direct data entry system.

Subscriber and Member (Patient) Carrier unique identifiers are being requested to aid with the matching algorithm, see PC107 and PC108.

Non-Massachusetts Resident

CHIA requires that payers submitting claims and encounter data on behalf of an employer group submit claims and encounter data for employees who reside outside of Massachusetts.

CHIA requires data submission for employees that are based in Massachusetts whether the employer is based in MA or the employer has a site in Massachusetts that employs individuals. This requirement is for all payers that are licensed by the MA Division of Insurance, ~~or are required by contract with the Group Insurance Commission to submit paid claims and encounter data for all Massachusetts residents, and all members of a Massachusetts employer group including those who reside outside of Massachusetts.~~

Deleted: are involved in the MA Health Connector's Risk Adjustment Program,

For payers reporting to the MA Division of Insurance, CHIA requires data submissions for all members where the "situs" of the insurance contract or product is Massachusetts regardless of residence or employer (or the location of the employer that signed the contract in Massachusetts).

Deleted: 6.0

Adjudication Data

CHIA requires adjudication-centric data in order to comply with analytic requirements. The elements typically used in an adjudication process are PC017, PC025, PC036, PC040 through PC042, PC063, PC065 through PC070 and PC110 and are variations of paper remittances or the HIPAA 835 4010.

Denied Claims: Payers will not be required to submit wholly denied claims at this time. CHIA will issue an Administrative Bulletin notifying Submitters when the requirement to submit denied claims will become effective, the detailed process required to identify and report, and the due dates of denied claim reporting.

Provider Identifiers

CHIA has made a conscious decision to collect numerous identifiers that may be associated with a provider. The identifiers will be used to help link providers across carriers in the event that the primary linking data elements are not a complete match. The existence of these extra identifying elements will improve the quality of our matching algorithms. Examples of these identifying elements include PC043-PC055 relating to the Prescribing Provider.

The Provider ID

Elements PC043 (Prescribing Provider ID) and PC048 (Prescribing Physician NPI) are critical elements which link the Prescribing Provider identified on the Pharmacy Claims file with the corresponding record in the Provider File (PV002). In addition to the risk holder, Pharmacy Benefit Managers must report the Provider IDs (PC043, PC048) and associated records within the Provider file. The definition of the PV002 element is:

The Provider ID is a unique number for every service provider (persons, facilities or other entities involved in claims transactions) that a carrier/submitter has in its system. This element may or may not be the provider NPI and this element is used to uniquely identify a provider and that provider's affiliation, when applicable, as well as the provider's practice location within this provider file.

The following are the elements that are required to link to PV002:

Pharmacy Claim Links: **PC043** – Prescribing Provider ID; **PC059** – Recipient PCP ID.

The goal of PV002, Provider ID, is to help identify provider data elements associated with provider data that was submitted in the claim line detail, and to identify the details of the Provider Affiliation.

CHIA is committed to working with all submitters and their technical teams to ensure compliance with applicable laws and regulations. CHIA will continue to provide

Deleted: 6.0

support through technical assistance calls and resources available on the CHIA website, <http://www.chiamass.gov/>.

File Guideline and Layout

Legend

1. File: Identifies the file per element as well as the Header and Trailer Records that repeat on all MA APCD File Types. Headers and Trailers are Mandatory as a whole, with just a few elements allowing situational reporting.
2. Col: Identifies the column the data resides in when reported
3. Elmt: This is the number of the element in regards to the file type
4. Data Element Name: Provides identification of basic data required
5. Date Modified: Identifies the last date that an element was adjusted
6. Type: Defines the data as Decimal, Integer, Numeric or Text. Additional information provided for identification, e.g., Date Period – Integer
7. Type Description: Used to group like-items together for quick identification
8. Format / Length: Defines both the reporting length and element min/max requirements. See below:
 - a. char[n] – this is a fixed length element of [n] characters, cannot report below or above [n]. This can be any type of data, but is governed by the type listed for the element, Text vs. Numeric.
 - b. varchar[n] – this is a variable length field of max [n] characters, cannot report above [n]. This can be any type of data, but is governed by the type listed for the element, Text vs. Numeric.
 - c. int[n] – this is a fixed type and length element of [n] for numeric reporting only. This cannot be anything but numeric with no decimal points or leading zeros.

The plus/minus symbol (**±**) in front on any of the Formats above indicate that a negative can be submitted in the element under specific conditions. **Example:** When the Claim Line Type (MC138) = V (void) or B (backout) then certain claim values can be negative.

9. Description: Short description that defines the data expected in the element
10. Element Submission Guideline: Provides detailed information regarding the data required as well as constraints, exceptions and examples.
11. Condition: Provides the condition for reporting the given data
12. %: Provides the base percentage that the MA APCD is expecting in volume of data in regards to condition requirements.
13. Cat: Provides the category or tiering of elements and reporting margins where applicable. 'A' level fields must meet their APCD threshold percentage in order for a file to pass. The other categories (B, C, Z) are also monitored but will not cause a file to fail. Header and Trailer

Mandatory element errors will cause a file to drop. Where elements have a conditional requirement, percentages are applied to the number of records that meet the condition.

HM = Mandatory Header element; HS = Situational Header element; HO = Optional Header element; A0 = Data is required to be valid per Conditions and must meet threshold percent with 0% variation; A1= Data is required to be valid per Conditions and must meet threshold percent with no more than 1% variation; A2 = Data is required to be valid per Conditions and must meet threshold percent with no more than 2% variation; B and C = Data is requested and errors are reported, but will not cause a file to fail; Z = Data is not required; TM = Mandatory Trailer element; TS = Situational Trailer element; TO = Optional Trailer element.

Elements that are highlighted indicate that a MA APCD lookup table is present and contains valid values expected in the element. In very few cases, there is a combination of a MA APCD lookup table and an External Code Source or Carrier Defined Table, these maintain the highlight.

It is important to note that Type, Format/Length, Condition, Threshold and Category are considered as a suite of requirements that the intake edits are built around to insure compliance, continuity and quality. This insures that the data can be standardized at other levels for greater understanding of healthcare utilization.

File	Co I	Elm t	Data Element Name	Date Modified	Type	Type Description	Format / Length	Description	Element Submission Guideline	Condition	%	Cat
HD-PC	1	HD 001	Record Type	11/8/12	Text	ID Record	char[2]	Header Record Identifier	Report HD here. Indicates the beginning of the Header Elements of the file.	Mandatory	100%	HM
