2013 Hospital Profile: MERCY MEDICAL CENTER

Cohort: Community, Disproportionate Share Hospital

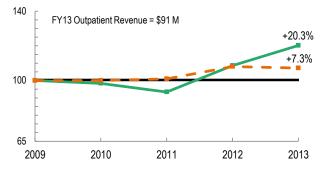

PATIENT REVENUE TRENDS

What was the hospital's net inpatient service revenue per case mix adjusted discharge between FY09 and FY13, and how does this hospital compare to the median hospital in its peer cohort?

How has the hospital's total outpatient revenue changed compared to FY09, and how does this hospital compare to the median hospital in its peer cohort? (FY09=100)

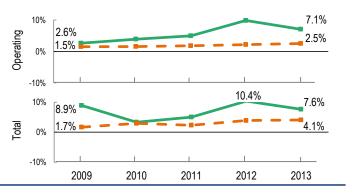

FINANCIAL PERFORMANCE

How have the hospital's total revenue and costs changed between FY09 and FY13?

Revenue, Cost & Profit/Loss (in millions)							
FY	Total Revenue	Operating Revenue	Non-Operating Revenue	Total Costs	Total Profit/Loss		
2009	\$232	\$217	\$15	\$211	\$20.7		
2010	\$216	\$217	(\$1)	\$209	\$7.2		
2011	\$218	\$218	\$0	\$207	\$11.0		
2012	\$244	\$242	\$1	\$219	\$25.2		
2013 [±]	\$130	\$129	\$1	\$120	\$9.9		

What were the hospital's total margin and operating margin between FY09 and FY13, and how do these compare to the median of its peer cohort hospitals?

For descriptions of the metrics, please see Technical Appendix.

* Disproportionate Share Hospitals (DSH) receive a minimum of 63% of gross patient service revenue

^ For more information on Community Hospital Acceleration, Revitalization and Transformation (CHART) special

funding, please contact the Health Policy Commission (HPC). ⁿ For more information on Delivery System Transformation Initiative (DSTI) special funding, please contact the

Massachusetts Executive Office of Health and Human Services (EOHHS)

[‡] Costs were adjusted to exclude direct medical education costs and physician compensation.

* Delivery DRG includes Cesarean and Vaginal Deliveries, and Neonate DRG.

[†] Average Hospital does not include Specialty hospitals.

* Reflects six months of data

from public payers.

QUALITY OVERVIEW

The selected quality measures displayed in this hospital's profile are derived from the Commonwealth's Standard Quality Measure Set (SQMS). CHIA is required to uniformly report hospital performance on SQMS measures. SQMS measures are used by health plans for tiering providers for certain insurance products. They may also be used to inform consumers about the quality and safety of their care providers. The selected indicators are hospital-specific measures based on information that hospitals self-report to CHIA and other entities, including the federal Centers for Medicare and Medicaid Services (CMS) and The Leapfrog Group.

PATIENT SAFETY

How many complications or adverse events were reported at this hospital for conditions included in the **PSI-90 Composite**, relative to the annual national average of 1.00? How does this compare to the median of its peer cohort?

PATIENT EXPERIENCE

How well did the hospital fulfill the following key expectations for patient experience, based on patient surveys? How does this compare to the national average?

100%

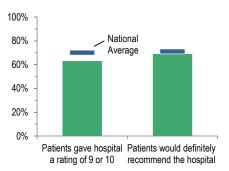

80%

60%

40%

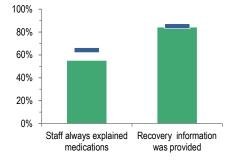

20%
