

Massachusetts Acute Care Hospital Readmissions Profile: July, 2012 to June, 2013

North Shore Medical Center

September 2015

In June, 2015 the Center for Health Information and Analysis (CHIA) released [Hospital-Wide Adult All-Payer Readmissions in Massachusetts: 2011-2013](#), its first annual report on hospital-wide all cause readmissions in the Commonwealth. That report applied the Hospital-Wide All-Cause Unplanned 30-day Readmission Measure developed by the Centers for Medicare and Medicaid Services (CMS) and the Yale Center for Outcomes Research to the adult all-payer population in the Commonwealth. It included detailed readmission statistics for the state as a whole and hospital-specific readmission rates for 62 acute-care hospitals. This readmission profile series provides more in-depth information on each hospital.

This profile contains readmission statistics for North Shore Medical Center presented in the context of the statewide figures and of the patient population that North Shore serves. CHIA hopes that these reports will be useful to hospitals and to other stakeholders working to reduce readmissions in the Commonwealth. The profile is based on data submitted by Massachusetts acute-care hospitals to CHIA's Hospital Discharge Database (see www.chiamass.gov/case-mix-data/).

It is important to note a few features of the Yale/CMS readmissions methodology as modified by CHIA for Massachusetts reporting.

- The calculations reflect the all-payer population. CMS reports on Medicare Fee-for-Service patients only.
- Readmissions from North Shore back to North Shore as well as those back to other acute-care hospitals in the Commonwealth are included.
- The calculations exclude primary psychiatric and obstetric discharges.
- The calculations include adults (age 18+) only.
- This profile primarily covers the state fiscal year FY13, from July, 2012 to June, 2013. Some data displays include the three-year period from July, 2010 to June 2013.
- Breakouts with fewer than 11 data points (e.g. discharges, readmissions, or patients) are suppressed to protect patient privacy.

Please note, the bar graph on frequent users (page 6 top) and the bar graphs for payer and discharge setting (page 3 right) have been updated to ensure consistency in calculation methods across different CHIA readmissions data products. For definitions of the terms and methodology used in this report please see the statewide report.

It is important to note that with the exception of the table on this page and the first figure on the next, the readmission rates reported here are not risk-adjusted. The patterns and trends reported in this profile reflect this hospital's patient case-mix, practice patterns, and any licensure for providing specialized inpatient services.

This report contains the following information profiling readmissions at North Shore. Except where indicated below, all displays cover the period from July 2012 to June 2013.

- [Overview readmissions statistics](#)
- [Risk-standardized readmission rates by hospital type](#)
- [Readmission rates by quarter \(July 2010 to June 2013\)](#)
- [Number of readmissions by time since discharge](#)
- [Readmission rates by age](#)
- [Readmission rates by payer type](#)
- [Readmission rates by discharge setting](#)
- [Diagnoses with the highest numbers and rates of readmissions](#)
- [Readmissions to other hospitals](#)
- [Readmissions among frequently hospitalized patients \(July 2010 to June 2013\)](#)
- [Detailed readmission figures for quarter, payer type, and discharge setting](#)

Overview Readmissions Statistics, July 2012 to June 2013

This table contains the overall readmission statistics for North Shore. The statewide figures are provided for comparison.

	North Shore	Statewide
Eligible Discharges	13,376	508,354
Readmissions	1,921	76,481
Readmission Rate	14.4%	15.0%
Risk-Standardized Readmission Rate	14.2%	15.0%

All-Payer Risk-Standardized Readmission Rates by Hospital Type, July 2012 to June 2013

This graph shows the distribution of risk-standardized readmission rates for hospitals. North Shore is indicated by the red dot. Please see the statewide report for information on how hospital types are defined.

All-Payer Readmission Rate by Quarter, July 2010 to June 2013

This graph shows the readmission rate for North Shore over time in comparison to the statewide rate.

Length of Time Between Discharge and Readmission, July 2012 to June 2013

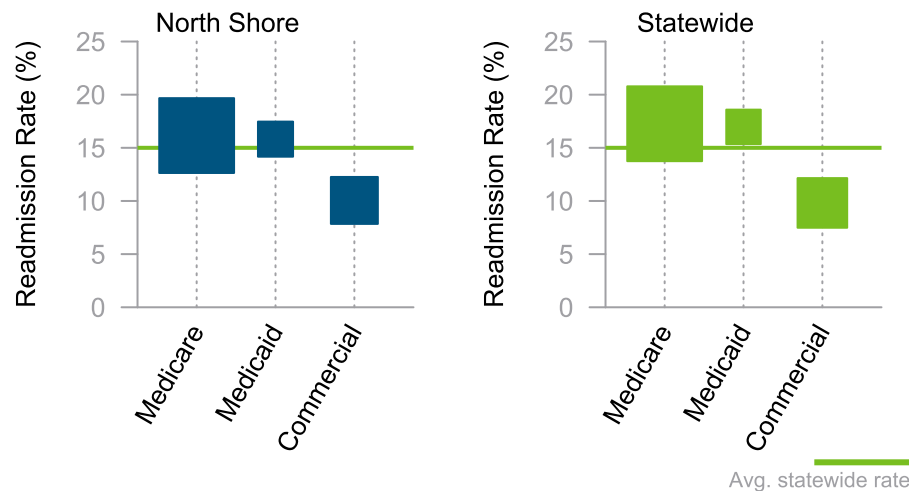

These plots show the percentage of readmissions by week from the time of the initial discharge.

All-Payer Readmission Rates by Age, July 2012 to June 2013

This graph shows readmission rates by age for North Shore and for the state.

All-Payer Readmission Rate by Payer Type, July 2012 to June 2013

These plots show hospital and statewide readmissions broken out by the expected payer type. Vertical position of the box indicates the rate, and the size of the box is proportional to the number of readmissions.

Payer Type Profile, July 2012 to June 2013

This chart compares the payer profile of discharges from North Shore that resulted in a readmission to the payer profile of all eligible discharges at North Shore. Note: "Self-Pay" and "Other" categories not shown.

All-Payer Readmission Rate by Discharge Setting, July 2012 to June 2013

This graph shows readmission rate by the setting to which the patient was originally discharged. Note: SNF = skilled nursing facility, HHA = home with home health agency care.

Discharge Setting Profile, July 2012 to June 2013

This graph shows the distribution of discharge settings for readmission discharges compared to all the eligible discharges at North Shore. Cells with < 11 cases are suppressed to protect patient privacy (indicated by "--").

Top Diagnoses with Highest Rates of Readmission, July 2012 to June 2013

This plot shows the 10 discharge conditions with the highest rates of readmissions for North Shore and corresponding figures for those conditions statewide. Note: Only conditions with 25 or more discharges and 11 or more readmissions are included.

Top Diagnoses with Highest Numbers of Readmissions, July 2012 to June 2013

These plots show the 10 discharge conditions with the highest numbers of readmissions at North Shore and the corresponding figures for those conditions statewide. The outlined bars represent the total number of discharges for each diagnosis, and the filled-in bars show the number of readmissions. The figures next to each bar give the readmissions rate. Note: Only conditions with 25 or more discharges and 11 or more readmissions are included.

Readmissions to Other Hospitals, July 2012 to June 2013

This figure shows the proportion of the readmissions from North Shore that were to another hospital, along with the corresponding statewide figure.

Characteristics of Readmissions to Other Hospitals, July 2012 to June 2013

This display provides more information on discharges from North Shore in which the patient was subsequently readmitted to another hospital. The top portion of the figure shows the top three other hospitals to which patients from North Shore were readmitted. The middle portion shows the regions in which these patients were readmitted. The bottom portion shows the types of hospitals to which they were readmitted. The percentage for each bar represents the percentage that group represents of the total number of readmissions from North Shore that were readmitted to other hospitals. Due to data privacy concerns, only groups with 11 or more readmissions are listed. For definitions of the geographic regions, please see the statewide report.

All-Payer Readmissions among Frequently Hospitalized Patients, July 2010 to June 2013

In the statewide report, CHIA reported readmissions for frequently hospitalized patients, defined as those with four or more admissions in any one-year period from July 2010 to June 2013. This chart shows the percentage of patients, discharges, and readmissions accounted for by frequently hospitalized patients at North Shore.

Hospital Readmissions among Frequently Hospitalized Patients by Payer Type, July 2010 to June 2013

	Number of Patients	Percentage within Group	Number of Discharges	Number of Readmissions	Readmission Rate (%)
Patients with Frequent Hospitalizations	1,542	100.0%	10,278	3,479	33.8%
Commercial	273	17.7%	1,611	548	34.0%
Medicare	1,053	68.3%	7,104	2,371	33.4%
Medicaid	161	10.4%	1,218	464	38.1%
Patients without Frequent Hospitalizations	20,203	100.0%	31,407	2,496	7.9%
Commercial	6,195	30.7%	8,456	465	5.5%
Medicare	10,262	50.8%	17,551	1,652	9.4%
Medicaid	2,516	12.5%	3,744	281	7.5%
Total Patients	21,745		41,685	5,975	14.3%

This table shows the breakdown of patients at North Shore with frequent hospitalizations by payer type, and the associated readmission rates for these groups. Note: Percentages within groups do not sum to 100 because the table excludes "Self-Pay" and "Other" categories which together sum to less than 5% of discharges. Patients with frequent hospitalizations are defined as those with four or more admissions in any one-year period from July 2010 to June 2013. Cells with fewer than 11 cases are suppressed to protect patient privacy and are indicated by dashes.

Detailed Readmissions Figures

This table contains breakouts of readmission rates by payer type, quarter, and discharge setting. Statistics for groups with fewer than 11 cases are excluded to protect patient privacy, and are indicated by dashes.

Characteristic	North Shore			Statewide		
	Number of Discharges	Number of Readmissions	Readmission Rate (%)	Number of Discharges	Number of Readmissions	Readmission Rate (%)
Overall, July 2012 to June 2013						
Overall	13,376	1,921	14.4%	508,354	76,481	15.0%
Age, July 2012 to June 2013						
18-64	5,377	723	13.4%	240,507	33,233	13.8%
65+	7,999	1,198	15.0%	267,847	43,248	16.1%
Year and Quarter, July 2010 to June 2013						
2010Q3	3,514	502	14.3%	134,869	21,499	15.9%
2010Q4	3,548	513	14.5%	136,216	21,753	16.0%
2011Q1	3,611	511	14.2%	136,669	21,851	16.0%
2011Q2	3,633	532	14.6%	137,362	21,712	15.8%
2011Q3	3,618	523	14.5%	133,936	21,038	15.7%
2011Q4	3,372	461	13.7%	133,129	20,490	15.4%
2012Q1	3,634	528	14.5%	133,659	20,553	15.4%
2012Q2	3,379	484	14.3%	131,942	19,904	15.1%
2012Q3	3,316	449	13.5%	127,337	19,077	15.0%
2012Q4	3,463	485	14.0%	127,928	19,583	15.3%
2013Q1	3,374	489	14.5%	127,151	19,071	15.0%
2013Q2	3,223	498	15.5%	125,938	18,750	14.9%
Payer Type, July 2012 to June 2013						
Medicare	7,937	1,282	16.2%	295,261	50,973	17.3%
Medicaid	1,745	276	15.8%	62,717	10,643	17.0%
Commercial	3,124	314	10.1%	129,873	12,749	9.8%
Discharge Setting, July 2012 to June 2013						
Home	5,703	663	11.6%	258,860	30,541	11.8%
SNF	3,090	484	15.7%	99,346	18,335	18.5%
HHA	3,558	587	16.5%	110,419	19,946	18.1%
Hospice	247	34	13.8%	3,851	429	11.1%
