FY12 filings are based on hospital's audited or internal financial statements.

Data Sources: Data drawn from CHIA quarterly and annual filings.

CAVEATS: Annual data is reconciled to Audited Financial Statements. CHIA filings may not reflect all of the financial resources available to the hospital -- for example, resources available through associations with foundations or parents/affiliates. Financial information must be interpreted within the context of other factors, including, but not limited to, management plans, reimbursement changes, market behavior, and other factors affecting performance. Hospitals may not report data for all metrics listed above. Profitability percentages may not add due to rounding.
