Table of Contents

Introduction

Access to timely, accurate, and relevant data is essential to improving quality, mitigating costs, and promoting transparency and efficiency in the health care delivery system. A valuable source of data can be found in health care claims. Using its broad statutory authority to collect, store and maintain health care information in a payer and provider claims database pursuant to M.G.L. c. 12C, the Center for Health Information and Analysis (CHIA) has adopted regulations to collect medical, pharmacy, and dental claims as well as provider, product, and member eligibility information derived from fully-insured, self-insured (where allowed), Medicare, Medicaid and Supplemental Policy data, which CHIA stores in a comprehensive All Payer Claims Database (APCD). CHIA serves as the Commonwealth's primary hub for health care data and a primary source of health care analytics that support policy development.

To facilitate communication and collaboration, CHIA actively maintains a MA APCD website (http://www.chiamass.gov/apcd-information-for-data-submitters/) with resources that currently include the submission and release regulations, Administrative Bulletins, the technical submission guide with examples, and support documentation. These resources are periodically updated with materials and CHIA staff are dedicated to working with all submitters to ensure full compliance with the regulation.

While CHIA is committed to establishing and maintaining an APCD that promotes transparency, improves health care quality, and mitigates health care costs, we welcome your ongoing suggestions for revising reporting requirements that facilitate our shared goal of administrative simplification. If you have any questions regarding the regulations or technical specifications we encourage you to utilize the online resources and reach out to our staff for any further questions.

Thank you for your partnership with CHIA on the all payer claims database.

957 CMR 8.00: APCD and Case Mix Data Submission

957 CMR 8.00 governs the reporting requirements regarding health care data and information that health care Payers and Hospitals must submit pursuant to M.G.L. c. 12C in connection with the APCD and the Acute Hospital Case Mix and Charge Data Databases. The regulation establishes the data submission requirements for the health care claims data and health plan information that Payers must submit and the procedures and timeframe for submitting such health care data and information. CHIA collects data essential for the continued monitoring of health care cost trends, minimizes the duplication of data submissions by payers to state entities, and promotes administrative simplification among state entities in Massachusetts.

 Except as specifically provided otherwise by CHIA or under Chapter 12C, claims data collected by CHIA for the APCD is not a public record under clause 26 of section 7 of chapter 4 or under chapter 66. No public disclosure of any health plan information or data

shall be made unless specifically authorized under 957 CMR 5.00. CHIA developed the data release procedures defined in CHIA regulations to ensure that the release of data is in the public interest, as well as consistent with applicable Federal and State privacy and security laws.

Patient Identifying Information

No patient identifying information may be included in any fields not specifically instructed as such within the element name, description and submission guideline outlined in this document. Patient identifying information includes name, address, social security number and similar information by which the identity of a patient can be readily determined.

Acronyms Frequently Used

APCD – All-Payer Claims Database

CHIA – Center for Health Information and Analysis

CSO – Computer Services Organization

DBA – Delegated Benefit Administrator

DBM – Dental Benefit Manager

DOI – Division of Insurance

GIC – Group Insurance Commission

ID – Identification; Identifier

MA APCD – Massachusetts' All-Payer Claims Database

NPI – National Provider Identifier

PBM – Pharmacy Benefit Manager

QA – Quality Assurance

RA – Risk Adjustment; Risk Adjuster

TME / RP – Total Medical Expense / Relative Pricing

TPA – Third Party Administrator

The File Types:
> DC – Dental Claims
>
> MC – Medical Claims
>
> ME – Member Eligibility
>
> PC – Pharmacy Claims
>
> PR – Product File
>
> PV – Provider File
>
> BP – Benefit Plan Control Total File

The MA APCD Quarterly Product File

As part of the MA APCD filings, all submitters are required to submit a Product (PR) File. CHIA recognizes this is a file type that has not been previously requested of carriers in other states, and has made efforts to simplify the data submission process as well as clarify what should be contained in the file and how CHIA will utilize this important dataset.

A PR File is required after the close of every calendar year quarter. This file reports all active products for that particular quarter and any products that became inactive during that quarter. By reporting products that are inactive, the MA APCD can identify eligibilities that may still be active under a product that is no longer offered to the market.

The reporting quarters are for the months of March (03), June (06), September (09) and December (12). As an example, the PR filing for products in the year 2011 are identified as 201103, 201106, 201109 and 201112. These files are required to be submitted and passed by the end-of-month inventory 201104, 201107, 201110 and 201201, one month after the close of the quarter.

The PR Detail Records are defined as one unique product per identifier, per begin/end period. Repeating PR identifiers (PR002) creates reporting anomalies and will require a resubmission of the file to uniquely identify products for ME linking and quality assurance.

Below are the details on business rules, data definitions and the uses of this data.

Specification Question	Clarification	Rationale
What is the frequency of submission?	A PR File is required to be submitted quarterly- one month after the close of every calendar year quarter.	CHIA requires quarterly files to meet reporting and analytic needs for the DOI, Researchers and others.
What is the format of the file?	Each submission must start with a Header Record and end with a Trailer Record to define the contents of the data within the submission. Each Detail Record must contain 18 elements in an asterisk delimited format.	The Header and Trailer Records help to determine period-specific editing and create an intake control for quality. The asterisk is an inherited symbol from previous filings that submitters had already coded their systems to compile for previous version of the MA APCD. An asterisk cannot be used within an element in lieu of another character.

Specification Question	Clarification	Rationale
What does each row in a file represent?	Each row, or Detail Record, contains the information of a unique Product that a carrier or Third-Party creates to 'sell'.	CHIA recognizes that information at this higher level is necessary for aggregation and reporting utilization.
How does CHIA define a Product?	A Product starts as a base offering, often described by a model that it conforms to; HMO, PPO, Indemnity, etc. Generally accepted values appear in PR004. For non-carriers, a Product will be defined by the business and reported in a free text field to define purpose when PR004 is populated with ZZ = Other.	CHIA requires that the disclosure of Pharmacy Benefit Management, Claims Processing, and Third Party Administrator organization business products, as well as Carrier-based products, to accurately assign member detail attribution for aggregate reporting and utilization.
What should be reported for License Type if not a 'carrier'?	The Product file now has an element that allows for further explanation when License Type is set to PBM or Other.	CHIA added two additional values so that PBMs and other non-insurance businesses can report products that they offer their clientele.
What should be reported for Risk if not a 'carrier'?	The Product file now has an element that allows for further explanation when Risk is set to Other.	CHIA added additional values to the Risk Table to differentiate Risk Offerings. One of the additions is an 'Other' value that sets the requirement to populate a text element for explanation.

Types of Data collected in the Product File

Product File Submitters

Beginning in November 2013 with the submission of December 2013 quarterly data, the Massachusetts All Payer Claims Database required the submission of **Product data** from all submitters - carriers, Pharmacy Benefit Managers, Claims Processing, Third Party Administrator organizations, etc.. This data is required to meet reporting and analytic needs for DOI, Researchers and others. We require these organization business products, as well as Carrier-based products, to accurately assign member detail attribution for aggregate reporting and utilization. CHIA has made a conscious decision to collect elementary identifiers that may be associated with not only Insurance-type Products but industry vendor Products as well. CHIA has added two additional values to license type so that PBMs and other non-insurance businesses can report products that they offer their clientele. In addition, CHIA added values to the Risk Table to differentiate Risk Offerings, including an Other option. This allows CHIA, as well as other state agencies, to measure offerings across submitters, providing a single source for reporting such information and furthering Administrative Simplification.

Non-Massachusetts Resident

CHIA requires that payers submitting claims and encounter data on behalf of an employer group submit claims and encounter data for employees who reside outside of Massachusetts.

CHIA requires data submission for employees that are based in Massachusetts whether the employer is based in MA or the employer has a site in Massachusetts that employs individuals. This requirement is for all payers that are licensed by the MA Division of Insurance, or are required by contract with the Group Insurance Commission to submit paid claims and encounter data for all Massachusetts residents, and all members of a Massachusetts employer group including those who reside outside of Massachusetts.

For payers reporting to the MA Division of Insurance, CHIA requires data submission for all members where the "situs" of the insurance contract or product is Massachusetts regardless of residence or employer (or the location of the employer that signed the contract is in Massachusetts).

Product Identifiers

CHIA has made a conscious decision to collect elementary identifiers that may be associated with not only Insurance-type Products but industry vendor Products as well. The data in elements PR002 through PR008 will be used by CHIA when analyzing Product data across carriers/submitters. PR002 will be used as the anchor that the Member Eligibility file will link to, while other elements will be used as attributes of the linked eligibility. This allows CHIA, as well as other state agencies, to measure offerings

across submitters, providing a single source for reporting such information and furthering Administrative Simplification.

Deductibles

CHIA is collecting Deductible band-width information on each Product as well as requesting additional identifiers to sort non-deductible reporting vendors into appropriate categories of business. This will aid CHIA in meeting its reporting and analysis requirements.

Additional data elements such as Coinsurances and Copays are reported in other file types.

Dates

CHIA is collecting two date elements for each Product detail record.

The Begin and End Date for each Product describes the dates the Product was active with the carrier and usable by eligible members. For Products that are still active the End Date should not contain any information (is Null). For Products that are not active but may still have claims being adjudicated against them, the End Date should be the End Date reported to the Division of Insurance OR the date the license was terminated OR, for non-insurance carriers, the date that the product/service is no longer being offered to insurance carriers.

CHIA is committed to working with submitters and their technical teams to ensure compliance with all applicable laws and regulations. CHIA will continue to provide support through technical assistance calls and resources available on the website, http://www.chiamass.gov/apcd-information-for-data-submitters/.

File Guideline and Layout

Legend

1. File: Identifies the file per element as well as the Header and Trailer Records that repeat on all MA APCD File Types. Headers and Trailers are Mandatory as a whole, with just a few elements allowing situational reporting.

2. Col: Identifies the column the data resides in when reported

3. Elmt: This is the number of the element in regards to the file type

4. Data Element Name: Provides identification of basic data required

5. Date Modified: Identifies the last date that an element was adjusted

6. Type: Defines the data as Decimal, Integer, Numeric or Text. Additional information provided for identification, e.g., Date Period – Integer

7. Type Description: Used to group like-items together for quick identification

8. Format / Length: Defines both the reporting length and element min/max requirements. See below:

   a. char[n] – this is a fixed length element of [n] characters, cannot report below or above [n]. This can be any type of data, but is governed by the type listed for the element, Text vs. Numeric.

   b. varchar[n] – this is a variable length field of max [n] characters, cannot report above [n]. This can be any type of data, but is governed by the type listed for the element, Text vs. Numeric.

   c. int[n] – this is a fixed type and length element of [n] for numeric reporting only. This cannot be anything but numeric with no decimal points or leading zeros.

   The plus/minus symbol (±) in front on any of the Formats above indicate that a negative can be submitted in the element under specific conditions. **Example:** When the Claim Line Type (MC138) = V (void) or B (backout) then certain claim values can be negative.

9. Description: Short description that defines the data expected in the element

10. Element Submission Guideline: Provides detailed information regarding the data required as well as constraints, exceptions and examples.

11. Condition: Provides the condition for reporting the given data

12. %: Provides the base percentage that the MA APCD is expecting in volume of data in regards to condition requirements.

13. Cat: Provides the category or tiering of elements and reporting margins where applicable. 'A' level fields must meet their APCD threshold percentage in order for a file to pass. The other categories (B, C, Z) are also monitored but will not cause a file to fail. Header and Trailer

Mandatory element errors will cause a file to drop. Where elements have a conditional requirement, percentages are applied to the number of records that meet the condition.

HM = Mandatory Header element; HS = Situational Header element; HO = Optional Header element; A0 = Data is required to be valid per Conditions and must meet threshold percent with 0% variation; A1= Data is required to be valid per Conditions and must meet threshold percent with no more than 1% variation; A2 = Data is required to be valid per Conditions and must meet threshold percent with no more than 2% variation; B and C = Data is requested and errors are reported, but will not cause a file to fail; Z = Data is not required; TM = Mandatory Trailer element; TS = Situational Trailer element; TO = Optional Trailer element.

Elements that are highlighted indicate that a MA APCD lookup table is present and contains valid values expected in the element. In very few cases, there is a combination of a MA APCD lookup table and an External Code Source or Carrier Defined Table, these maintain the highlight.

It is important to note that Type, Format/Length, Condition, Threshold and Category are considered as a suite of requirements that the intake edits are built around to ensure compliance, continuity and quality. This ensures that the data can be standardized at other levels for greater understanding of healthcare utilization.

File	Col	Elmt	Data Element Name	Date Modified	Type	Type Description	Format / Length	Description	Element Submission Guideline	Condition	%	Cat
HD-PR	1	HD001	Record Type	11/8/12	Text	ID Record	char[2]	Header Record Identifier	Report **HD** here. Indicates the beginning of the Header Elements of the file.	Mandatory	100%	HM
HD-PR	2	HD002	Submitter	11/8/12	Integer	ID OrgID	varchar[6]	Header Submitter / Carrier ID defined by CHIA	Report CHIA defined, unique Submitter ID here. TR002 must match the Submitter ID reported here. This ID is linked to other elements in the file for quality control.	Mandatory	100%	HM
HD-PR	3	HD003	National Plan ID	11/8/12	Integer	ID Nat'l PlanID	int[10]	Header CMS National Plan Identification Number (PlanID)	Do not report any value here until National PlanID is fully implemented. This is a unique identifier as outlined by Centers for Medicare and Medicaid Services (CMS) for Plans or Sub plans.	Situational	0%	HS
HD-PR	4	HD004	Type of File	11/8/12	Text	ID File	char[2]	Defines the file type and data expected.	Report **PR** here. Indicates that the data within this file is expected to be PRODUCT-based. This must match the File Type reported in TR004.	Mandatory	100%	HM
HD-PR	5	HD005	Period Beginning Date	11/8/12	Date Period - Integer	Century Year Month - CCYYMM	int[6]	Header Period Start Date	Report the Year and Month of the reported submission period in CCYYMM format. This date period must be repeated in HD006, TR005 and TR006. This same date must be selected in the upload application for successful transfer.	Mandatory	100%	HM

File	Col	Elmt	Data Element Name	Date Modified	Type	Type Description	Format / Length	Description	Element Submission Guideline	Condition	%	Cat
HD-PR	6	HD 006	Period Ending Date	11/8/12	Date Period - Integer	Century Year Month - CCYYMM	int[6]	Header Period Ending Date	Report the Year and Month of the reporting submission period in CCYYMM format. This date period must match the date period reported in HD005 and be repeated in TR005 and TR006.	Mandatory	100%	HM
HD-PR	7	HD 007	Record Count	11/8/12	Integer	Counter	varchar[10]	Header Record Count	Report the total number of records submitted within this file. Do not report leading zeros, space fill, decimals, or any special characters.	Mandatory	100%	HM
HD-PR	8	HD 008	Comments	11/8/12	Text	Free Text Field	varchar[80]	Header Carrier Comments	May be used to document the submission by assigning a filename, system source, compile identifier, etc.	Optional	0%	HO
HD-PR	9	HD 009	APCD Version Number	2/2019	Decimal - Numeric	ID Version	char[4]	Submission Guide Version	Report the version number as presented on the APCD Product File Submission Guide in 0.0 Format. Sets the intake control for editing elements. Version must be accurate else file will drop. **EXAMPLE:** 3.0 = Version 3.0	Mandatory	100%	HM
								Code	*Description*			
								2.0	Prior Version; valid only for reporting periods prior to October 2013			
								3.0	Version 3.0; required for reporting periods as of October 2013 – No longer valid as of May 2015			
								4.0	Version 4.0; required for reporting periods October 2013 onward; No longer valid as of August 2016			
								5.0	Version 5.0; required for reporting periods October 2013 onward as of August 2016; No longer valid as of August 2017			
								6.0	Version 6.0; required for reporting periods October 2013 onward as of August 2017. No longer valid as of August 2019			
								2019	Version 2019; required for reporting periods October 2013 onward as of August 2019
