

# Massachusetts Case Mix

## Hospital Inpatient Discharge Data (HIDD)

Fiscal Year 2019

Documentation Manual

# Massachusetts Case Mix FY2019 Hospital Inpatient Discharge Data

## USER GUIDE

### Table of Contents

Executive Summary.....	3
Part A. Data Collection .....	4
Part B: Applying For and Using CHIA Data .....	6
Part C: Data Elements .....	8
Part D. Data Notes .....	76

## Executive Summary

Each quarter, Massachusetts facilities provide to the Center for Health Information and Analysis (CHIA) data collected from acute care hospital inpatient discharges. The FY2019 Hospital Inpatient Discharge Database (HIDD) includes inpatient discharges that occurred between October 1, 2018 and September 30, 2019. Facilities reported a total of 809,048 discharges.

The FY2019 HIDD Guide provides general information about CHIA's most recent inpatient discharge data holdings. This information includes high level data notes (data collection, data application, and use) and a codebook (data element list, data dictionary, reference tables, and summary statistics).

## Part A. Data Collection

Acute care hospitals in Massachusetts are required to submit inpatient discharge data to CHIA under **957 CMR 8.00 - APCD and Case Mix Data Submission** and Regulation 957 CMR 5.00: Health Care Claims, Case Mix and Charge Data Release Procedures. Researchers can access HIDD regulations by visiting CHIA's web site at <http://www.chiamass.gov/regulations> or by faxing a request to CHIA at 617-727-7662.

**957 CMR 8.00 - APCD and Case Mix Data Submission** requires acute care hospitals to submit inpatient discharge data to CHIA 75 days after each quarter. The quarterly reporting intervals for the FY2019 HIDD are as follows:

- **Quarter 1: October 1, 2018 - December 31, 2018**
- **Quarter 2: January 1, 2019 – March 31, 2019**
- **Quarter 3: April 1, 2019 – June 30, 2019**
- **Quarter 4: July 1, 2019 – September 30, 2019**

CHIA reviews each hospital's quarterly data for compliance with *957 CMR 8.00 - APCD and Case Mix Data Submission* using a one percent error rate. The one percent error rate is based upon the presence of one or more errors per discharge for the hospital's quarterly submission. CHIA checks for valid codes, correct formatting, and presence of the required data elements. If one percent or more of the discharges are rejected, CHIA rejects the entire quarterly submission.

Each hospital receives a quarterly error report displaying invalid discharge information. Quarterly data that does not meet the one percent compliance standard must be resubmitted by the reporting hospital until the standard is met.

### Emergency Department (ED) Visits and Outpatient Observation Unit Initiated Stays

Discharges that began in an ED Visit and ended in an inpatient discharge will have a code '2' in the ED Flag Code field. Discharges that began in an observation unit stay and ended in an inpatient discharge will have a code '2' in the Outpatient Observation Stay Flag Code field. Any ED visit or observation stay that resulted in an inpatient discharge will appear in the FY2019 HIDD, and should not appear in the FY2019 Outpatient Emergency Department Database or FY2019 Outpatient Observation Stay Database. If the ED Flag Code is '2', or other evidence of an emergency department visit is noted in the data, such as source of admission code is 'R' (within hospital emergency room transfer) or '045X' revenue codes in the service table for ED utilization, then Providers are requested to report ED Boarding information. This information is reported in five fields:

- Number of hours in the ED
- ED Registration Date
- ED Registration Time
- ED Discharge Date

- ED Discharge Time

### HIDD Verification Report Process

Semi-annually CHIA sends each hospital a profile report of their discharge data to maintain and improve the quality of their submissions. The Verification Report process gives the hospitals the opportunity to review the data they have provided to CHIA and affirm data accuracy and completeness.

CHIA asks each hospital to review and verify the data contained within the report. Each Verification Report has a series of frequency tables for selected data elements that include, but are not limited to, the number of discharges per month and breakouts by admission type, admission source, race, and patient status.

Hospitals must affirm that reported data is accurate and complete or identify any discrepancies on the year-end verification cycle. Hospitals certify the accuracy and completeness of their data by completing a Verification Report Response form. CHIA accepts two response types from hospitals:

**A:** A hospital indicates its agreement that the data appearing on the Verification Report is accurate and that it represents the hospital's case mix profile.

**B:** A hospital indicates that the data on the report is accurate except for the discrepancies noted. If any data discrepancies exist, CHIA requests that hospitals provide written explanations of the discrepancies.

Users interested in the FY2019 HIDD Verification Reports should contact CHIA at [CaseMix.data@state.ma.us](mailto:CaseMix.data@state.ma.us). Please indicate the fiscal year of the Verification Report, the dataset name, and if the information is needed for a specific hospital or set of hospitals.

## Part B: Applying For and Using CHIA Data

Researchers interested in receiving approval to access CHIA data should follow the instructions below to apply for the data. Due to the custom nature of each data use request, limited information covering all data uses is provided by CHIA. Users needing additional assistance applying for data or using the data should contact CHIA at [CaseMix.data@state.ma.us](mailto:CaseMix.data@state.ma.us).

### How to Apply for the Data

- To obtain a copy of the Application Form, Data Use Agreement, Data Management Plan and/or other documents required for application, go to: <http://www.chiamass.gov/chia-data/>
- Follow the links to the forms that correspond to the data (Case Mix, MA APCD) and application type (Government, Non-Government) that are appropriate to the data request.
- Non-Government users can access a pre-configured Limited Data Set (LDS), designed to protect patient data confidentiality while ensuring analytic value. This streamlined dataset also improves CHIA's ability to deliver the data efficiently.

### Securing CHIA Data Prior to Use

Approved data recipients, or agents, are obliged by the application and confidentiality agreement to secure the data in a manner that protects the confidentiality of the records and complies fully with the terms of CHIA's Data Use Agreement. All data obtained from CHIA must reside on an encrypted hard drive and/or secure network.

### Data Delivery

CHIA delivers HIDD on CD-ROMs. Users must be able to meet the following Hardware and CD requirements. Users must also be able to read and download the data files to their back office.

### Hardware Requirements:

- CD ROM Device
- Encrypted Hard Drive with 2.0 GB of space available

### Data Use

The FY2019 Case Mix HIDD consists of up to 13 Microsoft Access Database (.mdb) files or 9 SAS files (.sas7bdat). Each file name will have a suffix of “\_Full\_AAAA\_BBBB”. AAAA indicates the specific view of the data. BBBB indicates if the data is an LDS or Government dataset.

- The main FIPA\_HDD\_2019\_**Discharge**\_ (table name: Discharge), contains one record per discharge. The unique identifier on this table is the RecordType20ID.
- FIPA\_HDD\_2019\_**DiagnosisCode**\_ (table name: DiagnosisCode), contains one record per diagnosis reported for each visit. The Discharge table has a one-to-many relationship with this table by linking the RecordType20ID.
- FIPA\_HDD\_2019\_**ProcedureCode**\_ (table name: ProcedureCode), contains one record per procedure for each visit. The Discharge table has a one-to-many relationship with this table by linking the RecordType20ID.

- FIPA\_HDD\_2019\_**Service**\_ (table name: Service), contains one record per revenue code service reported for each visit. The Discharge table has a one-to-many relationship with this table by linking the RecordType20ID.
- FIPA\_HDD\_2019\_**Organization**\_ (table name: Organization) contains one record per organization. This table can be used to lookup facility names, EMS region, and Teaching status. The Discharge table has a many to one relationship with this Table by linking the appropriate OrgId (IdOrgFiler, IdOrgHosp, IdOrgSite or IdOrgTransfer).
- FIPA\_HDD\_2019\_**SubmissionLog**\_ (table name: SubmissionLog) contains one record per quarter for each of the Inpatient facilities filing data. The Discharge table has a many to one relationship with this Table by linking the IdOrgFiler.
- FIPA\_HDD\_2019\_**Error Log**\_ (table name: ErrorLog) contains records by quarter and by fiscal year on the number of records pass and fail and the reason for fail by IdOrgFiler. The Discharge table has a one- to- many relationship with this Table by linking the RecordType20ID.

#### **Diagnosis-Related Groupers (DRGs):**

- FIPA\_HDD\_2019\_**APR200**, FIPA\_HDD\_2019\_**APR261**, FIPA\_HDD\_2019\_**APR300**, FIPA\_HDD\_2019\_**APR340**, FIPA\_HDD\_2019\_**CMS360** contain grouper data. In the Microsoft Access Database (mdb) release, each of the five DRG versions are released as separate tables. The Discharge table has a one-to-one relationship with each table by linking the RecordType20ID.

## Linking Files

Historically, case mix data users receive a Microsoft Access version of the data. Access is not a recommended development platform, and is used here as a convenient data transport format only. Most users import the data into SQL, STATA™, SPSS™, SAS™, or R for analysis or data management. To accommodate the expanding one-to-many relationship between the main discharge table and other tables (due to lifting the limit on the number of diagnoses and procedure codes), files distributed will contain multiple tables that are linked using the **RecordType20ID** field. The RecordType20ID field is a unique identifier used to link the main Discharge table to Services, Diagnoses, DRGs and Procedures tables. The OrgID field in the Organization table can be linked to columns on the Discharge table fields that contain Organization ID numbers (IdOrgFiler, IdOrgSite, IdOrgHosp, and IdOrgTransfer).

## Part C: Data Elements

The following section should provide the user with an explanation of some of the data. For more information about specific data elements, facility reporting thresholds, or other questions about the data, please contact CHIA at [CaseMix.data@state.ma.us](mailto:CaseMix.data@state.ma.us).

### About the Limited Data Set (LDS)

The pre-configured Limited Data Set (LDS) is designed to protect patient data confidentiality while ensuring analytic value. All users can access the “core” data elements. Users wishing to add to the “core” elements must indicate this by selecting from the list of “buy-ups.” An applicant could use the “Buy-up” process to receive more granular data. For example, the user can request a “buy-up” to a 5 digit patient zip code instead of a 3 digit patient zip code. CHIA must review buy-up requests and may approve the request based on the project description. CHIA makes an additional set of core elements available only to government users. Government users must specifically identify requested Government-Only elements in their application.

### Master Data Elements List

For the FY2019 HIDD, CHIA provides a master data elements list by table. Not every user has access to every data element—some are reserved for limited dataset buy-ups or for government use. All users have access to the “CORE” data. Users who choose limited dataset buy-ups may receive access to some “LDS” elements. Only government users may have access to the “GOV” fields. Users interested in purchasing the data should visit the CHIA website for instructions.

**DISCHARGE TABLE—CORE ELEMENTS**

## Organization Table

The “Organization” table contains 1 record for every valid OrgId reported in the Discharge database. Referenced OrgId’s include: IdOrgFiler, IdOrgHosp, IdOrgSite, and IdOrgTransfer data elements in the Discharge database. The OrgIds referenced in FY2019 HIDD are listed in Table 1.

**Table 1. ORGANIZATION IDENTIFICATION**

<b>Principal Data Element:</b>	ORGID FIELDS
<b>Other Data Elements:</b>	IdOrgFiler IdOrgHosp IdOrgSite IdOrgTransfer
<b>Rules:</b>	The Organization Table will contain 1 record for every valid OrgId reported in the Discharge database. The following table lists Hospitals only for submissions in a recent year.

Note: The organization table contains information on all organizations submitting data and other organizations transferring patients to organizations. Below is a list of the 75 organizations submitting inpatient data in FY2019.

ORGID	ORGANIZATION NAME
1	Anna Jaques Hospital
2	Athol Memorial Hospital
3	North Shore Medical Center – Union Campus
4	Baystate Medical Center
5	Baystate Franklin Medical Center
7	Berkshire Health System - Berkshire Campus
8	Fairview Hospital
10	Beth Israel Deaconess Medical Center - East Campus
16	Boston Medical Center
22	Brigham and Women’s Hospital
25	Signature Healthcare - Brockton Hospital
27	Cambridge Health Alliance
39	Cape Cod Hospital
40	Falmouth Hospital
41	Steward - Norwood Hospital

ORGID	ORGANIZATION NAME
42	Steward - Carney Hospital
46	Children's Hospital Boston
49	MetroWest Medical Center - Framingham Campus
50	Cooley Dickinson Hospital
51	Dana-Farber Cancer Institute
53	Beth Israel Deaconess Hospital - Needham
57	Emerson Hospital
59	Brigham and Women's - Faulkner Hospital
62	Steward - Good Samaritan Medical Center - Brockton Campus
66	Melrose Wakefield Healthcare - Lawrence Memorial Hospital Campus
68	Harrington Memorial Hospital
71	Health Alliance Hospitals, Inc.
73	Heywood Hospital
75	Steward - Holy Family Hospital
77	Holyoke Medical Center
79	Beth Israel Deaconess – Plymouth (Jordan)
81	Lahey Clinic -- Burlington Campus
83	Lawrence General Hospital
85	Lowell General Hospital – Main Campus
88	Martha's Vineyard Hospital
89	Massachusetts Eye and Ear Infirmary
91	Massachusetts General Hospital
97	Milford Regional Medical Center
98	Beth Israel Deaconess - Milton
99	Steward - Morton Hospital
100	Mount Auburn Hospital
101	Nantucket Cottage Hospital
103	New England Baptist Hospital

ORGID	ORGANIZATION NAME
104	Tufts-New England Medical Center
105	Newton-Wellesley Hospital
106	Baystate Noble Hospital
109	Lahey Health - Addison Gilbert Campus
110	Lahey Health - Beverly Campus
114	Steward - Saint Anne's Hospital
115	Lowell General - Saints Campus
116	North Shore Medical Center, Inc. - Salem Campus
118	Mercy Medical Center - Providence Behavioral Health Hospital Campus
119	Mercy Medical Center - Springfield Campus
122	South Shore Hospital
123	Southcoast Hospitals Group - Charlton Memorial Campus
124	Southcoast Hospitals Group - St. Luke's Campus
126	Steward - St. Elizabeth's Medical Center
127	Saint Vincent Hospital
129	Sturdy Memorial Hospital
130	UMass Memorial Medical Center - Memorial Campus
131	UMass Memorial Medical Center - University Campus
132	Health Alliance - Clinton Hospital
133	Marlborough Hospital
138	Lahey Winchester Hospital
139	Baystate Wing Memorial Hospital
141	Melrose-Wakefield Healthcare - Melrose-Wakefield Hospital Campus
142	Cambridge Health Alliance - Everett (Whidden) Hospital Campus
145	Southcoast Health- Tobey Campus
457	MetroWest Medical Center - Leonard Morse Campus
4448	Lahey Medical Center, Peabody
4460	Steward - Good Samaritan Medical Center - Norcap Lodge Campus

ORGID	ORGANIZATION NAME
6693	Shriners Hospital for Children – Boston
11466	Steward - Holy Family at Merrimack Valley
11467	Steward - Nashoba Valley Medical Center
11718	Shriner's Children's Hospital - Springfield

## Groupers

For data user convenience, CHIA performs data grouping using the 3M™ APR-DRG grouper and the CMS grouper. The All Patient Refined DRGs (3M APR-DRG) classifies patients into diagnostic groups based on severity of illness and risk of mortality to provide an accurate means of adjusting for hospital case mix differences for evaluating inpatient care across all hospitals. For FY2019 HIDD, CHIA has produced five versions of the Grouper: APR-DRG versions 20.0, 26.1, 30.0 and 34.0 and CMS version 36.0.

For the APR-DRG version 20.0, a discharge DRG, MDC, ROM and SOI are generated. For APR-DRG versions 26.1, 30.0 and 34.0, both an admission and discharge DRG, MDC, ROM and SOI are generated. For the CMS DRG version 36.0, a discharge DRG and MDC are generated.

- The **Diagnosis Related Group (DRG)** places a patient into a clinically relevant medical category.
- The **Major Diagnostic Categories (MDC)** is a classification system that parses all principal diagnoses into one of 25 categories primarily for use with DRGs and reimbursement activity. Each category relates to a physical system, disease, or contributing health factor.
- **Risk of mortality (ROM)** is a clinical subclass indicating likelihood of dying. The ROM subclass data elements can be found in the ROM lookup table. In the APR-DRG system, a patient is assigned four distinct descriptors for ROM, numbered sequentially from 0 to 4. Researchers seeking to evaluate patient mortality, should use the 3M™ APR-DRGs in conjunction with the ROM subclass.
- **Severity of Illness (SOI)** relates to the extent of physiologic decompensation or systematic loss of organ function experienced by the patient. In the APR-DRG system, a patient is assigned four distinct descriptors for SOI, numbered sequentially from 0 to 4. The SOI subclass data elements can be found in the SOI lookup table. CHIA recommends that researchers seeking to evaluate resource use or establishing patient care guidelines use the 3M™ APR-DRGs in conjunction with SOI subclass.

## Organization of the Diagnosis and Procedure Codes

For FY2019, CHIA organized the procedure and diagnosis fields into three tables—Discharge, Diagnosis, and Procedure.

All secondary diagnosis and procedure codes are in the Diagnosis and Procedure tables, respectively. Indicator codes are available for each secondary diagnosis or procedure code and are based on the order in which those codes were sent to CHIA. In the indicator code field, an 'A' is used to designate admitting diagnosis and an indicator code of 'D' designates discharge diagnosis, all other diagnosis codes have an indicator of 'S' for secondary diagnosis. In the

associated indicator code field, the admitting and discharge diagnosis have a code of '0' and secondary diagnosis have sequential numeric codes based on the order submitted. Discharges reached a maximum of 96 secondary diagnosis codes, and a maximum of 142 secondary procedure codes.

Diagnoses and procedures are ordered as submitted to CHIA. CHIA does not require the order of diagnoses and procedures to be medically relevant. CHIA does not affirm or confirm the medical relevancy of the principal diagnosis, procedure, or E-code reported on the discharge table.

## Organization Identifiers (OrgID)

FY2019 HIDD contains four organization identifier fields. These fields are a CHIA assigned unique code for each Massachusetts facility:

- **Massachusetts Filer Organization ID (IdOrgFiler):** The Organization ID for the facility that submitted the Inpatient discharge data to CHIA.
- **Massachusetts Site Organization ID (IdOrgSite):** The Organization ID for the site where the patient received Inpatient care.
- **Massachusetts Hospital Organization ID (IdOrgHosp):** The Organization ID for the main hospital affiliation. For example 3108 (Cambridge Health Alliance) is the IdOrgHosp for the IdOrgSite 142 (Everett Hospital).
- **Massachusetts Transfer Hospital Organization ID (IdOrgTransfer):** is the Organization ID for the facility from which a patient is transferred. If the patient is transferred from outside of Massachusetts, the IdOrgTransfer will be 9999999.

## Age LDS

If the date of birth and admission date are valid, then CHIA calculated Age LDS in years. The calculation was as follows:

- Age is calculated to be the rounded integer value – of the difference between Date of Birth and Discharge date.
- Age is zero when less than 1 year.
- If Age is valid and < 90, then AgeLDS = Age
- If Age is valid and > 89 and <= 115, then AgeLDS = 999
- If Age is missing, negative value or value > 115, then AgeLDS = null

Discretion should be used whenever a questionable age assignment is noted. Researchers are advised to consider other data elements in their analysis of this field.

## Data Limitations

The HIDD is derived from patient discharge summaries, which can be traced to information entered by admitting and attending health professionals into the medical record. The quality of the HIDD is dependent upon facility data collection policies and coding practices of the medical record staff.

Information may not be entirely consistent from facility to facility due to differences in:

- Collection and verification of patient supplied information before or at admission,
- Medical record coding, consistency, and/or completeness,
- Extent of facility data processing capabilities,
- Flexibility of facility data processing systems,

- Capacity of financial processing system to record late occurring charges on CHIA's electronic submission,
- Non-comparability of data collection and reporting.

## Historical Data Elements

Users of multiple years of Case Mix data should be careful when merging multiple years of data. In order to maintain consistency across years, it may be necessary to merge some codes used for specific data elements. Users with questions about new data elements or changes in coding from year to year should contact CHIA at [CaseMix.data@state.ma.us](mailto:CaseMix.data@state.ma.us).

## Data Dictionary

FY2019 HIDD data dictionary provides metadata for the following attributes:

- *Data Element*: name as it appears in the file
- *Short description*: to help users understand what the element contains
- *Primary table*: the main table (MS ACCESS) or file (SAS) that the data element will appear in
- *Linking tables*: other tables that contain the data element
- *Availability to users*: indicates if the data is available to all users (“CORE”), a buy-up (“LDS”), or available only to government “Government”
- *Type of Data*: describes if the data element is Categorical, Ordinal, an Identifier, Continuous, Date/Time, or Open Text
- *Format*: indicates if the data is formatted in a specific fashion
- *CHIA derived or calculated*: indicates if the field was created by CHIA
- *Reference table*: indicates if a Categorical data element has set of valid values that are associated with other information
- *Description*: is a longer explanation of the data element and its limitations
- *Summary statistics*: links to frequencies or means for that data element

Users of the data with questions about any specific data element should contact CHIA at [CaseMix.data@state.ma.us](mailto:CaseMix.data@state.ma.us).

**Linking Tables:**  
**Availability to Users:** CORE  
**Type of Data:** Categorical  
**Format:**  
**Length:** 6  
**CHIA Derived:** No  
**Description:** International Classification of Diseases, 10th Revision, Clinical Modification (ICD) V-

codes, and or W-codes, X-codes, or Y-codes (V00-Y99) are used to categorize events and conditions describing the external cause of injuries, poisonings, and adverse effects. Codes adequate to describe the external cause are reported for discharges with a principal and/or other diagnoses classified as injuries or poisonings of the ICD-10-CM (S00-T88) or where the ICD-10-CM codes demonstrate that an additional E-code is appropriate. The principal external cause of injury code shall describe the mechanism that caused the most severe injury, poisoning, or adverse effect. Additional codes used to report place of occurrence or to completely describe the mechanism(s) that contributed to the injury or poisoning or the causal circumstances surrounding any injury or poisoning are reported in the Diagnosis table. This data element describes the principal external cause of injuries, poisonings, and adverse effects using ICD-9-CM codes. In addition to the dedicated E-Code field, facilities record additional E-Codes in the associated diagnosis fields for conditions having multiple causes.

**Reference Table:** Standard ICD-9-CM or ICD-10-CM Diagnosis Codes

**EDFlagCode**

**Linking Tables:**  
**Availability to Users:** GOV-SPEC  
**Type of Data:** Open Text  
**Format:** VARCHAR  
**Length:** 10  
**CHIA Derived:** No  
**Description:** The unique number assigned to each patient within the hospital that distinguishes the patient and the patient's hospital record(s) from all others in that institution.  
**Reference Table:** No

### MotherMedicalRecordNumber

**Short Description:** Patient's mother's unique hospital assigned identifier  
**Primary Table:** Discharge  
**Linking Tables:**  
**Availability to Users:** GOV-SPEC  
**Type of Data:** Open Text  
**Format:** VARCHAR  
**Length:** 10  
**CHIA Derived:** No  
**Description:** The medical record number assigned within the hospital to the newborn's mother is to be reported for the newborn. The medical record number of the newborn's mother distinguishes the patient's mother and the patient's mother's hospital record(s) from all others in that institution.  
**Reference Table:** No

### MothersUHIN

**Short Description:** Patient's mother's unique ID.  
**Primary Table:** Discharge  
**Linking Tables:**  
**Availability to Users:** LDS  
**Type of Data:** Open Text  
**Format:** Open Text  
**Length:** 9

<b>CHIA Derived:</b>	No
<b>Description:</b>	CHIA generated unique identifier of a newborn's mother. For newborns or for infants less than 1 year old, CHIA derives a unique ID for the patient's mother. This unique ID allows a newborn visit to be associated with a Mother's visit. Linkable across records and fiscal years. Each patient is given by CHIA a Unique Health Information Number (UHIN), which is a surrogate key that can link patients over time and across facilities. The data element is blank, a single dash (-) appears in the UHIN field. It is valid for facilities to report that the unique patient identifier is unknown. In these cases, the UHIN appears as '000000001'. The utility of the UHIN field is dependent on the reporting data. For a small number of facilities, little or no UHIN data exists, as these institutions failed to report patients' uniquely identified information. Other facilities reported the same data repeatedly, resulting in numerous admissions for one UHIN. In other cases, the demographic information (age, sex, etc.) was not consistent when a match did exist with the UHIN. Some explanations for this include assignment of a mother's unique identifiers to her infant or assignment of a spouse's unique identifiers to a patient. Invalid data uses the code UHIN="4".
<b>Reference Table:</b>	No

### NewBornAge

<b>Short Description</b>	Newborn's age in weeks at admission
<b>Primary Table:</b>	Discharge
<b>Linking Tables:</b>

<b>Length:</b>	5
<b>CHIA Derived:</b>	No
<b>Description:</b>	First five digits of patient's temporary, Massachusetts ZIP Code. ZIP Codes are not standardized and this field is as reported from a nine-digit ZIP Code. The Limited Data Set supports selection of 3-character ZIP Code or 5-character ZIP Code for approval by CHIA. Government users may be able to request a 9-character ZIP Code. For LDS users only, if the patient state is not in Massachusetts or a state bordering Massachusetts (Connecticut, Maine, New Hampshire, New York, or Rhode Island) ZIP Codes are set to zeros (0s) and the state is removed.

<b>CHIA Derived:</b>	No
<b>Description:</b>	The full, undiscounted charges summarized by specific accommodation revenue code(s). Total charges should not include charges for telephone service, television or

private duty nurses. Any charges for a leave of absence period are to be included in the routine accommodation charges for the appropriate service (medical/surgical, psychiatry) from which the patient took the leave of absence. Any other routine admission charges or daily charges under which expenses are allocated to the routine or special care reporting centers on the CHIA-403 must be included in the total charges. This is the grand total of charges associated with the patient's inpatient stay. The total charge amount should be rounded to the nearest dollar. A charge of \$0 is not permitted unless the patient has a special Departure Status.

### UHIN

<b>Short Description</b>	Unique patient id created by CHIA.
<b>Primary Table:</b>	Discharge
<b>Linking Tables:</b>	
<b>Availability to Users:</b>	LDS
<b>Type of Data:</b>	Identifier
<b>Format:</b>	VARCHAR
<b>Length:</b>	9
<b>CHIA Derived:</b>	No
<b>Description:</b>	CHIA generated unique identifier of the patient. Linkable across records and fiscal years. Each patient is given by CHIA a Unique Health Information Number (UHIN), which is a surrogate key that can link patients over time and across facilities. The data element is blank, a single dash (-) appears in the UHIN field. It is valid for facilities to report that the unique patient identifier is unknown. In these cases, the UHIN appears as '000000001'. The utility of the UHIN field is dependent on the

reporting data. For a small number of facilities, little or no UHIN data exists, as these institutions failed to report patients' uniquely identified information. Other facilities reported the same data repeatedly, resulting in numerous admissions for one UHIN. In other cases, the demographic information (age, sex, etc.) was not consistent when a match did exist with the UHIN. Some explanations for this include assignment of a mother's unique identifiers to her infant or assignment of a spouse's unique identifiers to a patient. Invalid data uses the code UHIN="4".

**Reference Table:** No

### UHIN\_SequenceNo

**Short Description** Order of hospital discharges for a patient.

**Primary Table:** Discharge

**Linking Tables:**

**Availability to Users:** LDS

**Type of Data:** Continuous

**Format:** VARCHAR

**Length:** 3

**CHIA Derived:** Yes

**Description:** This calculated field indicates the chronological order of Inpatient discharge for patients with multiple Inpatient discharges in a fiscal year. A match with the UHIN only, is used to make the determination that a patient has had multiple discharges. The Sequence Number uses the following data conventions: (1) The sequence number is calculated by sorting the file by UHIN and discharge date (in ascending order). (2) The sequence number is then calculated by incrementing a counter for each UHIN's set of discharges. A sequence number of "1" indicates the first discharge for the UHIN in that fiscal year. (3) If a UHIN has two visits on the same day, the visit date is used as the secondary sort key. (4) If the UHIN is undefined (not reported, unknown or invalid), the sequence number is set to zero.

## Longer Reference Tables

FY2019 HIDD has 20 standard reference tables. These relate to categorical variables that are driven by the *Hospital Inpatient Discharge Database October 2016 Submission Guide*. Some of the tables have been integrated into the data dictionary. This section contains longer tables used by multiple data elements. Users of the data with additional questions about any specific Reference table should contact CHIA at [CaseMix.data@state.ma.us](mailto:CaseMix.data@state.ma.us).

## Part D. Data Notes

At the time of this publication the following data notes were present from resubmissions that were available in the June 2020 release of FY2019 HIDD. As data findings occur, CHIA will update the FY19 HIDD Release Notes published on the CHIA website at <https://www.chiamass.gov/case-mix-data/>. Data notes have been updated in this Documentation Manual to reflect updates to the FY19 HIDD Release as of March 5, 2021.

- APR 30 DRGs - CHIA identified an issue that affected the APR DRG assignments in FY2019 for children under the age of 1. All infants were assigned an age of 0. It impacted infant DRGs who were admitted for medical care after they were born who had a newborn age in weeks greater than '0' and birthweight blank. Boston Children's Hospital case mix has a larger proportion of such cases so this anomaly is apparent in their top ten DRGs. The volume of such cases at other hospitals is less since they also contain adults as part of their case mix. This issue impacted FY19 data releases prior to March 5, 2021. For more information, please refer to Part D.1.
- Dana-Farber Cancer Institute (Org Id 51) initially reported they had no inpatient discharges for quarter 4 of FY19. However, once the final FY19 HIDD was created, Dana-Farber advised that this was incorrect and submitted Q4 inpatient data with 383 discharges. Extracts released after March 5, 2021 include quarter 4 data.
- Beth Israel Deaconess Hospital - Milton (Org Id 98), Needham (Org Id 53) and Plymouth (Org Id 79) incorrectly reported Source of Admission in FY19. A high percentage (> 96%) of discharges were reported as directly referred to hospital inpatient status by a Physician. This resulted in an understatement of the number of discharges reported as Self Referral/Walk-In and ER Transfers. Data extracts released after March 5, 2021 include corrections. For more information, please refer to Part D.2.
- Steward Hospitals reported a high number of discharges with a Secondary Payer Type of Self-Pay in their FY19 submissions. This was due to an internal mapping issue which has been corrected for FY20. Due to a system issue, approximately 40 inpatients were incorrectly reported as discharged from Steward Holy Family Hospital (Org Id 75) in quarter 3 of FY19 instead of Holy Family Hospital at Merrimack Valley (Org Id 11466). This issue has been resolved but was identified too late to allow for resubmissions. However, all other reported FY19 quarters are accurate.
- Southcoast Hospitals Group – Charlton Memorial Campus (Org Id 123), St. Luke's Campus (Org Id 124) and Tobey Campus (Org Id 145) reported a high number of discharges with invalid Transfer Org IDs (9999999) in their FY19 submissions. Four quarter files which failed validation thresholds were included in the Final FY19 HIDD since corrections were not able to be submitted.
- Athol Hospital (Org Id 2), Martha's Vineyard Hospital (Org Id 88) and Nantucket Cottage Hospital (Org Id 101) included swing bed discharges in their FY19 submissions which could potentially affect certain performance measures. Corrections to identify FY19 swing bed discharges with new Source of Admission and Patient Status codes were not able to be submitted.
- Lahey Hospital & Medical Center - Burlington (Org Id 81) and Sturdy Memorial Hospital (Org Id 129) incorrectly used Revenue Code 0111 - Medical/Surgical/GYN routine service charges for accommodations in a private room (1 bed) in their FY19 submissions. A high percentage (> 90%) of their discharges included this revenue code.
- New England Baptist Hospital (Org Id 103) no longer collects the information required to create a Unique Health Information Number (UHIN). UHIN will still be available for patients that were in their system prior to the change.

### Updates since the FY 2019 HIDD Interim data release include:

- Fairview Hospital (Org Id 8) corrected entries to Source of Admission and Patient Status to identify swing bed discharges for all quarters of FY19.
- Cambridge Health Alliance – Cambridge Hospital (Org Id 27) and Everett (Whidden) Hospital (Org Id 142) corrected entries to Payer Type for quarter 4 of FY19.
- New England Baptist Hospital (Org Id 103) corrected entries to Accommodations Revenue Code used for routine service charges for all quarters of FY19.
- North Shore Medical Center – Salem Campus (Org Id 116) and Union Campus (Org Id 3) corrected entries to Payer Type for all quarters of FY19.
- Southcoast Hospitals Group – Charlton Memorial Campus (Org Id 123), St. Luke’s Campus (Org Id 124) and Tobey Campus (Org Id 145) corrected entries for missing Admitting and Discharge Diagnosis Code for all quarters of FY19.

Prior to releasing the Final FY2019 HIDD, CHIA provides the hospitals with a profile of the data submitted. Providers may resubmit data or may provide written feedback to CHIA. Below is a summary of some of the key feedback received:

- Beth Israel Deaconess Hospital – Milton (Org Id 98), Needham (Org Id 53) and Plymouth (Org Id 79):
  - Due to a system conversion, some FY19 discharges were reported without an Attending NPI.
- Cambridge Health Alliance – Cambridge Hospital (Org Id 27) and Everett Hospital (Org Id 142):
  - Due to a system conversion, the validation reports could not be fully reviewed for FY19. However, all reported data passed validation thresholds.
- Sturdy Memorial Hospital (Org Id 129):
  - Due to an internal mapping issue, some FY19 discharges were reported with missing or invalid Source of Admission codes. Specifically, EMS transfers were coded incorrectly.

## PART D.1 – APR DRG UPDATE

CHIA identified an issue that affected the APR DRG assignments in FY2019 for infants under the age of 1 year old and greater than 1 day old. This issue occurred in extracts prior to March 5, 2021. In general the Grouper uses age in years for assigning DRGs. However, for infants under age 1 year the Grouper utilizes an age in weeks. In extracts prior to March 5<sup>th</sup> all infants were assigned an age of 0. We corrected the issue and all extracts after March 5<sup>th</sup> have the updated DRGs.

For the pre-March 5<sup>th</sup> extracts this issue impacted infant DRGs who were admitted for medical care after they were born who had a newborn age in weeks greater than '0' and birthweight blank. The birthweight field is blank because the infants were admitted after they were born. Children's Hospital case mix has a larger proportion of infants admitted for medical care who were not born at their hospital so that this anomaly was more pronounced in their top ten DRGs. It would not have appeared in top ten DRGs of other hospitals that have a larger proportion of adults as part of their case mix. The volume of such cases at hospitals is listed below. In addition we have included a breakdown by DRG pre and post-March 5<sup>th</sup> 2021.

**Newborn Weight DRGs assigned to records without a Newborn Weight  
And with age in weeks Greater than '0'**  
**Note: Asterisk (\*) is for cell suppression of less than 11 discharges**

45	CVA & precerebral occlusion w infarct	*
48	Peripheral, cranial & autonomic nerve disorders	*
49	Bacterial & tuberculous infections of nervous system	22
50	Non-bacterial infections of nervous system exc viral meningitis	*
51	Viral meningitis	46

52	Nontraumatic stupor & coma	13
53	Seizure	130
54	Migraine & other headaches	*
55	Head trauma w coma >1 hr or hemorrhage	48
57	Concussion, closed skull Fx nos,uncomplicated intracranial injury, coma < 1 hr or no coma	23
58	Other disorders of nervous system	30
70	Orbital procedures	*
73	Eye procedures except orbit	13
80	Acute major eye infections	*
82	Eye disorders except major infections	14
89	Major cranial/facial bone procedures	69
90	Major larynx & trachea procedures	25
92	Facial bone procedures except major cranial/facial bone procedures	*
95	Cleft lip & palate repair	15
97	Tonsil & adenoid procedures	*
98	Other ear, nose, mouth & throat procedures	84
113	Infections of upper respiratory tract	171
114	Dental & oral diseases & injuries	*
115	Other ear, nose, mouth,throat & cranial/facial diagnoses	45
120	Major respiratory & chest procedures	12
121	Other respiratory & chest procedures	15
130	Respiratory system diagnosis w ventilator support 96+ hours	37
131	Cystic fibrosis - pulmonary disease	*
132	BPD & oth chronic respiratory diseases arising in perinatal period	47
133	Pulmonary edema & respiratory failure	174
135	Major chest & respiratory trauma	*
136	Respiratory malignancy	*
137	Major respiratory infections & inflammations	27
138	Bronchiolitis & RSV pneumonia	1449
139	Other pneumonia	118
140	Chronic obstructive pulmonary disease	*
141	Asthma	29
142	Interstitial & alveolar lung diseases	*
143	Other respiratory diagnoses except signs, symptoms & minor diagnoses	105
144	Respiratory signs, symptoms & minor diagnoses	45
160	Major cardiothoracic repair of heart anomaly	82
162	Cardiac valve procedures w cardiac catheterization	*
163	Cardiac valve procedures w/o cardiac catheterization	53
167	Other cardiothoracic procedures	108
169	Major thoracic & abdominal vascular procedures	26
171	Perm cardiac pacemaker implant w/o AMI, heart failure or shock	*

173	Other vascular procedures	57
175	Percutaneous cardiovascular procedures w/o AMI	*
177	Cardiac pacemaker & defibrillator revision except device replacement	*
191	Cardiac catheterization w circ disord exc ischemic heart disease	*
193	Acute & subacute endocarditis	*
194	Heart failure	*
196	Cardiac arrest	*
197	Peripheral & other vascular disorders	*
199	Hypertension	*
200	Cardiac structural & valvular disorders	33
201	Cardiac arrhythmia & conduction disorders	35
204	Syncope & collapse	*
205	Cardiomyopathy	*
206	Malfunction, reaction, complication of cardiac/vasc device or procedure	*
207	Other circulatory system diagnoses	20
220	Major stomach, esophageal & duodenal procedures	32
221	Major small & large bowel procedures	50
222	Other stomach, esophageal & duodenal procedures	84
223	Other small & large bowel procedures	27
224	Peritoneal adhesiolysis	*
225	Appendectomy	*
226	Anal procedures	*
228	Inguinal, femoral & umbilical hernia procedures	24
229	Other digestive system & abdominal procedures	*
241	Peptic ulcer & gastritis	*
243	Other esophageal disorders	51
245	Inflammatory bowel disease	*
246	Gastrointestinal vascular insufficiency	*
247	Intestinal obstruction	*
248	Major gastrointestinal & peritoneal infections	*
249	Non-bacterial gastroenteritis, nausea & vomiting	133
251	Abdominal pain	*
252	Malfunction, reaction & complication of GI device or procedure	*
253	Other & unspecified gastrointestinal hemorrhage	*
254	Other digestive system diagnoses	89
260	Major pancreas, liver & shunt procedures	*
261	Major biliary tract procedures	*
262	Cholecystectomy except laparoscopic	*
263	Laparoscopic cholecystectomy	*
264	Other hepatobiliary, pancreas & abdominal procedures	*
279	Hepatic coma & other major acute liver disorders	*
281	Malignancy of hepatobiliary system & pancreas	*

283	Other disorders of the liver	15
284	Disorders of gallbladder & biliary tract	*
304	Dorsal & lumbar fusion proc except for curvature of back	*
305	Amputation of lower limb except toes	*
309	Hip & femur procedures for non-trauma except joint replacement	*
312	Skin graft, except hand, for musculoskeletal & connective tissue diagnoses	*
315	Shoulder, upper arm & forearm procedures	*
317	Tendon, muscle & other soft tissue procedures	*
320	Other musculoskeletal system & connective tissue procedures	*
340	Fracture of femur	*
342	Fractures & dislocations except femur, pelvis & back	*
343	Musculoskeletal malignancy & pathol fracture d/t musckel malig	*
344	Osteomyelitis, septic arthritis & other musculoskeletal infections	*
346	Connective tissue disorders	19
349	Malfunction, reaction, complic of orthopedic device or procedure	*
351	Other musculoskeletal system & connective tissue diagnoses	*
361	Skin graft for skin & subcutaneous tissue diagnoses	*
364	Other skin, subcutaneous tissue & related procedures	18
381	Major skin disorders	10
383	Cellulitis & other bacterial skin infections	74
384	Contusion, open wound & other trauma to skin & subcutaneous tissue	12
385	Other skin, subcutaneous tissue & breast disorders	31
405	Other procedures for endocrine, nutritional & metabolic disorders	*
421	Malnutrition, failure to thrive & other nutritional disorders	243
422	Hypovolemia & related electrolyte disorders	54
423	Inborn errors of metabolism	17
424	Other endocrine disorders	23
425	Electrolyte disorders except hypovolemia related	*
441	Major bladder procedures	*
442	Kidney & urinary tract procedures for malignancy	*
443	Kidney & urinary tract procedures for nonmalignancy	15
445	Other bladder procedures	*
447	Other kidney, urinary tract & related procedures	*
460	Renal failure	*
461	Kidney & urinary tract malignancy	*
463	Kidney & urinary tract infections	144
465	Urinary stones & acquired upper urinary tract obstruction	*

466	Malfunction, reaction, complic of genitourinary device or proc	*
468	Other kidney & urinary tract diagnoses, signs & symptoms	*
481	Penis procedures	*
483	Testes & scrotal procedures	*
501	Male reproductive system diagnoses except malignancy	*
513	Uterine & adnexa procedures for non-malignancy except leiomyoma	*
518	Other female reproductive system & related procedures	*
530	Female reproductive system malignancy	*
531	Female reproductive system infections	*
532	Menstrual & other female reproductive system disorders	*
580	Neonate, transferred <5 days old, not born here	100
581	Neonate, transferred < 5 days old, born here	912
583	Neonate w ECMO	24
588	Neonate bwt <1500g w major procedure	104
589	Neonate bwt <500g or GA <24 weeks	74
591	Neonate birthwt 500-749g w/o major procedure	61
593	Neonate birthwt 750-999g w/o major procedure	98
602	Neonate bwt 1000-1249g w resp dist synd/oth maj resp or maj anom	138
603	Neonate birthwt 1000-1249g w or w/o other significant condition	33
607	Neonate bwt 1250-1499g w resp dist synd/oth maj resp or maj anom	161
608	Neonate bwt 1250-1499g w or w/o other significant condition	80
609	Neonate bwt 1500-2499g w major procedure	53
611	Neonate birthwt 1500-1999g w major anomaly	97
612	Neonate bwt 1500-1999g w resp dist synd/oth maj resp cond	260
613	Neonate birthwt 1500-1999g w congenital/perinatal infection	*
614	Neonate bwt 1500-1999g w or w/o other significant condition	610
621	Neonate bwt 2000-2499g w major anomaly	148
622	Neonate bwt 2000-2499g w resp dist synd/oth maj resp cond	244
623	Neonate bwt 2000-2499g w congenital/perinatal infection	18
625	Neonate bwt 2000-2499g w other significant condition	534
626	Neonate bwt 2000-2499g, normal newborn or neonate w other problem	1926
630	Neonate birthwt >2499g w major cardiovascular procedure	181
631	Neonate birthwt >2499g w other major procedure	162
633	Neonate birthwt >2499g w major anomaly	1939
634	Neonate, birthwt >2499g w resp dist synd/oth maj resp cond	803
636	Neonate birthwt >2499g w congenital/perinatal infection	149

639	Neonate birthwt >2499g w other significant condition	2629
640	Neonate birthwt >2499g, normal newborn or neonate w other problem	60119
651	Other procedures of blood & blood-forming organs	*
660	Major hematologic/immunologic diag exc sickle cell crisis & coagul	20
661	Coagulation & platelet disorders	*
662	Sickle cell anemia crisis	*
663	Other anemia & disorders of blood & blood-forming organs	27
680	Major O.R. procedures for lymphatic/hematopoietic/other neoplasms	*
681	Other O.R. procedures for lymphatic/hematopoietic/other neoplasms	*
690	Acute leukemia	*
693	Chemotherapy	17
694	Lymphatic & other malignancies & neoplasms of uncertain behavior	*
710	Infectious & parasitic diseases including HIV w O.R. procedure	37
711	Post-op, post-trauma, other device infections w O.R. procedure	*
720	Septicemia & disseminated infections	55
721	Post-operative, post-traumatic, other device infections	14
722	Fever	135
723	Viral illness	80
724	Other infectious & parasitic diseases	118
756	Acute anxiety & delirium states	*
757	Organic mental health disturbances	*
760	Other mental health disorders	*
773	Opioid abuse & dependence	*
776	Other drug abuse & dependence	20
791	O.R. procedure for other complications of treatment	*
811	Allergic reactions	*
812	Poisoning of medicinal agents	*
813	Other complications of treatment	*
815	Other injury, poisoning & toxic effect diagnoses	33
816	Toxic effects of non-medicinal substances	*
841	Extensive 3rd degree burns w skin graft	*
842	Full thickness burns w skin graft	*
843	Extensive 3rd degree or full thickness burns w/o skin graft	*
844	Partial thickness burns w or w/o skin graft	16
850	Procedure w diag of rehab, aftercare or oth contact w health service	12
861	Signs, symptoms & other factors influencing health status	117
862	Other aftercare & convalescence	*
863	Neonatal aftercare	254

912	Musculoskeletal & other procedures for multiple significant trauma	*
950	Extensive procedure unrelated to principal diagnosis	12
951	Moderately extensive procedure unrelated to principal diagnosis	59
952	Nonextensive procedure unrelated to principal diagnosis	18
955	Principal diagnosis invalid as discharge diagnosis	*
956	Ungroupable	33

## PART D.2 BETH ISRAEL DEACONESS (BID) SOURCE OF ADMISSION INFORMATION

**FY19 resubmissions corrected over-reporting of Physician Referrals & under-reporting of Walk-in/Self Referrals and ER Transfers for Inpatient Source of Admission**

**Note: Asterisk (\*) is for cell suppression of less than 11 discharges**

SOURCE OF ADMISSION (excluding newborns) <b>BID-MILTON (ORG ID 98)</b>	FY 2018	FY 2019 (pre March 5, 2021)	FY 2019 (post March 5, 2021)
1-Direct Physician Referral	1383	6088	1413
2-Within hospital Clinic Referral		*	
3-Health Plan Referral			*
4-Transfer from Acute Hospital		*	*
5-Transfer from SNF	23		
M-Walk In/Self-Referral	4407		4641
R-Within hospital ER Transfer			24
Total Discharges	5813	6098	6088

SOURCE OF ADMISSION (excluding newborns) <b>BID-NEEDHAM (ORG ID 53)</b>	FY 2018	FY 2019 (pre March 5, 2021)	FY 2019 (post March 5, 2021)
0-Information Not Available			1
1-Direct Physician Referral	291	2757	316
2-Within hospital Clinic Referral	*	11	11
4-Transfer from Acute Hospital	*	*	*
5-Transfer from SNF	*	57	57
6-Transfer from ICF		*	*
8-Court/Law Enforcement		*	*
9-Other		*	
M-Walk In/Self-Referral	2492		695
R-Within hospital ER Transfer			1717
Y-Ambulatory Surgery Transfer		*	*

X-Observation	*		
Y-Ambulatory Surgery Transfer	100	47	47
Total Discharges	10743	11358	11298

NOTES:

1. Source of admission was reported incorrectly in FY19 initial HIDD submissions. Files were resubmitted and data corrections are reflected in FY19 HIDD extracts available after March 5, 2021.
2. In FY19, BID-Needham changed their workflow due to a Joint Commission survey which required a source of admission of "ER transfer" when a patient was moved from the ER to inpatient status.
3. In FY18, BID-Plymouth was following the Joint Commission guideline but in FY19 stopped editing the source of admission when a patient transferred from the ER to inpatient status.
