# **Hospital Outpatient Observation Database Documentation Manual**

## **5 Year Summary**

**Fiscal Years 2000, 2001, 2002, 2003, 2004**

Division of Health Care Finance and Policy  
Two Boylston Street  
Boston, Massachusetts 02116-4704

<http://www.mass.gov/dhcfp>

## Table of Contents

	<u>Page</u>
Overview	1
Hospital Addresses, DPH ID, Org ID & Service Site Numbers	2
HCF Calculated Fields	7
Hospital Data Verification Discrepancies by Year	8
Cautionary Use Hospitals by Year	15
Hospital Charge & Discharge Totals by Quarter & by Fiscal Year*	16
Outpatient Observation Record Counts by Fiscal Year	28

\*The 5-Year Summary Manual includes discharge and charge totals for Fiscal Year 2003 & 2004 only, as totals were not included in the documentation for FY 2000, 2001, and 2002.

## OVERVIEW

The Division of Health Care Finance and Policy collects case mix and charge data for all Outpatient Observation patients discharged from Massachusetts acute care hospitals. The collection of data is mandated by **Regulation 114.1 CMR 17.00**: “Requirement for the Submission of Hospital Case Mix and Charge Data”. The Outpatient Observation Database contains comprehensive patient-level information, including socio-demographics, clinical data, and charge data. Hospitals report data to the Division on a quarterly basis for the fiscal year beginning October 1<sup>st</sup>. The Division creates a yearly database, which is available to the public through the Division’s application process.

This Manual summarizes five years of outpatient observation discharge data submissions for Fiscal Years 2000, 2001, 2002, 2003, and 2004. The five-year summary contains only basic information about the database. It is intended for experienced users of the DHCFP data, or users analyzing multiple years that might need only basic yearly database information. The Summary data consists of the following tables:

- a) Hospital Responses by Year, including Hospital Reported Discrepancies and Hospitals with No Verification Response Report
- b) Cautionary Use Hospitals by Fiscal Year;
- c) Hospital Charge and Discharge Totals by Quarter & Fiscal Year\*

New users, and/or those requiring more detailed information, should consult the yearly documentation manuals. The yearly manuals include information on database development, grouper methodology, data elements, error categories, the verification report process, and individual hospital-reported discrepancies in response to the data verification process. The yearly manuals also contain the discharge and revenue file tables, data code tables, and supplementary information, including alphabetical and numerical payer source lists.

Since the Hospital Outpatient Observation Data is not static, hospitals continue to submit and resubmit updated data throughout the year until the Division has closed out the fiscal data year. Yearly data is validated by hospitals. Validation occurs at the end of the fiscal data year during the Verification Process. Quarterly submissions are processed through electronic quality checks for compliance with regulatory requirements and can pass or fail based on those quality checks during quarterly data submissions. However, at the close of the Division’s fiscal data year, hospital contacts review and verify summary reports containing the final submission information for their hospital. The hospital contact reviews the information for accuracy and can resubmit corrected data or note any discrepancies found in the reports. All discrepancies and hospital comments are included in the detailed yearly documentation provided for users of the complete year-end Hospital Outpatient Observation Data. Only limited information concerning the discrepancies is included in the 5-year summary.

Copies of Regulation 114.1 CMR 17.00: Requirement for the Submission of Hospital Case Mix and Charge Data and Regulation 114.5 CMR 2.00: Disclosure of Hospital Case Mix and Charge Data may be obtained by logging on to the Division’s web site at <http://www.mass.gov/dhcfp/>.

**HOSPITAL ADDRESSES, DPH ID, ORG ID & SERVICE SITE ID NUMBERS**

This section contains a list of hospital names, addresses (for the physical location of the hospital), and unique identification numbers. The Organization ID and the DPH ID are unique numbers assigned to each hospital by the Division and the Department of Public Health, respectively, to allow for easy identification of the facility on the database. The facility site number is an assigned number used to distinguish multiple sites that fall under one DPH number.

**Hospital Organization ID**

A unique facility number assigned by the Division to identify the main hospital organization.

**Hospital Filing Org ID**

The number under which the hospital files data.

**DPH Number**

The Massachusetts Department of Public Health’s four-digit identification number.

**Facility Site Number**

A hospital determined number used to distinguish multiple sites that fall under one Massachusetts Department of Public Health (MDPH) facility number. It is the ID number for the site where the service took place.

### **HCF CALCULATED FIELDS**

**Age Calculation** – Age is calculated by subtracting the date of birth from the admission date. If dates are invalid, ‘999’ is placed in this field.

**Newborn Age** - Newborn age is calculated to the nearest week (the remainder is dropped) – subtracting the date of birth from the admission date and dividing by 7. Thus, newborns zero to six days old are considered to be zero weeks old. Discharges that are not newborns (>1 year old) have ‘99’ in this field.

**Observation Sequence Number** - The observation sequence number is calculated by incrementing a counter for each UHIN’s set of admissions. Sequence Number is calculated by sorting the entire database by UHIN, admission date, then discharge date (both dates are sorted in ascending order). If the UHIN is valid, the sequence number is calculated by incrementing a counter from 1 to nnnn, where a sequence number of 1 indicates the first admission for the UHIN, and nnnn indicates the last admission for the UHIN. If a UHIN has 2 admissions on the same day, the discharge date is used as the secondary sort key. If the Unique Health Information Number (UHIN) is undefined (not reported, unknown or invalid), the sequence number is set to zero.

**Number of Days Between Observation Stays** – For UHINs with two or more admissions, the days between stays is calculated by subtracting the previous discharge date from the current admission date. If the previous discharge date is greater than the current admission date or the previous discharge date or current admission date is invalid (i.e., 03/63/95), DAYS BETWEEN STAYS is set to ‘9999’ to indicate an error.

**2. CAUTIONARY USE HOSPITALS BY YEAR**

Cautionary use hospitals are those which the Division did not receive four quarters of acceptable discharge data, as specified by the 114.1 CMR 17.00 Regulation. The following table lists the cautionary use hospitals and reason(s) for failure, for each fiscal year.

<b>FY2000</b>		
<b>Hospital</b>	<b>Cautionary Use Quarters &amp; Reason</b>	<b>Acceptable Quarters</b>
Hallmark - Malden	No data for Q4.	Q1 – Q3

<b>FY2001</b>		
No cautionary use hospitals for FY2001. All hospitals submitted 4 quarters of acceptable data.		

<b>FY2002</b>		
No cautionary use hospitals for FY2002. All hospitals submitted 4 quarters of acceptable data.		

<b>FY2003</b>		
Due to new Division processing system, 9 hospitals were inadvertently flagged as Cautionary Use Hospitals for FY03. Data users should ignore the Cautionary Use Flag for the following hospitals:		
Berkshire Medical Center		
Beth Israel Deaconess Medical Center		
Children’s Hospital		
Fairview Hospital		
Mercy Hospital – Springfield		
North Shore – Salem		
North Shore – Union		
Saint Vincent		
Tufts New England Medical Center		

<b>FY2004</b>		
No cautionary use hospitals for FY2004. All hospitals submitted 4 quarters of acceptable data.		

Outpatient Observation Database Documentation Manual – 5 Year Summary

**3. HOSPITAL CHARGE & DISCHARGE TOTALS BY QUARTER**
