

Behavioral Health in Massachusetts

Technical Appendix
June 2025

Behavioral Health Dashboard

TECHNICAL APPENDIX

Context Domain	4
Behavioral Health, Mental Health, and Substance Use Disorder Member Months	4
Had a visit for Behavioral Health, Mental Health, or Substance Use Disorder in the Past 12 Months	5
Most recent emergency department (ED) visit in the Past 12 Months was for a condition related to Behavioral Health, Mental Health, or Substance Use Disorder	6
Suicide deaths per 100,000 population, Massachusetts	7
Drug Overdose Deaths per 100,000 population, Massachusetts	8
Alcohol-Related Deaths per 100,000 population, Massachusetts	9
Tobacco and Heavy Alcohol Use among Massachusetts adults	10
Access Domain	11
Any Individual Unmet Need for Behavioral Health Care in the Past 12 Months Because of the Cost of Care	11
Any Family Unmet Need for Behavioral Health Care in the Past 12 Months Because of the Cost of Care	12
Percent of Behavioral Health-Related Emergency Department Visits Resulting in Excess Length of Stay	13
Finance Domain	15
Behavioral Health Spending as a Percent of Total Health Care Spending	15
Percent of individuals that paid entire cost of most recent Mental Health visit out of pocket	17
Member Cost Sharing for Mental Health and SUD Visits	18
Behavioral Health Inpatient Spending as a Percent of Total Behavioral Health Spending	19
Behavioral Health Outpatient Spending as a Percent of Total Behavioral Health Spending	20
Behavioral Health Emergency Department Observation as a Percent of Total Behavioral Health Spending	22
Behavioral Health Prescription Drug Spending as a Percent of Total Behavioral Health Spending	24
Utilization Domain	25
Behavioral Health Related Hospital Inpatient Discharges	25
Behavioral Health-Related Length of Stay at Acute Hospitals	26
Behavioral Health Emergency Department Visits at Acute Care Hospitals, per 100,000 population	27
Opioid-Related Emergency Department Visits	28
Opioid-Related Inpatient Discharges	29
Psychotherapy Utilization per 1,000 commercially insured members, by age group	30
Insured Members with at least one Mental Health Prescription	32
Quality Domain	33
Behavioral Health Screening in Primary Care	33

Initiation and Engagement of SUD Treatment.....	35
Metabolic Monitoring for Children and Adolescents on Antipsychotics (APM)	37
Follow-up after ED visit for Mental Health 7 day (FUM)	38
Follow-up after Hospitalization for Mental Illness 7 day (FUH).....	39
Equity Domain.....	40
Had a visit for Behavioral Health in the past 12 Months	40
Most recent Emergency Department visit was for a condition related to Mental Health or Substance Use Disorder (SUD).....	42
Any Family Unmet Need for Behavioral Health Care in the Past 12 Months because of the Cost of Care	44
Percent of individuals that paid entire cost of most recent Mental Health visit out of pocket.....	45

Context Domain

Behavioral Health, Mental Health, and Substance Use Disorder Member Months

Insurance Category	Year	Behavioral Health	Mental Health	SUD
Commercial	2022	22.0%	20.7%	1.4%
	2023	23.0%	21.6%	1.4%
MassHealth	2022	30.2%	24.5%	5.7%
	2023	29.0%	23.9%	5.1%
Medicare Advantage	2022	15.7%	13.5%	2.2%
	2023	16.8%	14.4%	2.4%

1. **Date:** 4/1/2025
2. **Data years:** Calendar Year (CY) 2022 and 2023, data collected 2024.
3. **Description of metric:** Percentage of member months with a behavioral health (mental health and/or substance use disorder) diagnosis. Percentage of behavioral health member months over all member months by insurance category. Behavioral health member months as a proportion of total member months is calculated by the Center for Health Information and Analysis's (CHIA) Primary Care and Behavioral Health data collection from Massachusetts payers. Insurance categories include Commercial, MassHealth, and Medicare Advantage.
4. **Numerator & exclusions:** Behavioral health member months. These member months are collected through the sum of mental health and substance use disorder (SUD) member months.
5. **Denominator & exclusions:** Total member months.
6. **Stratifier(s):** Insurance category.
7. **Data source:** The Center for Health Information and Analysis (CHIA) Massachusetts Annual Report 2025. [Annual Report on the Performance of the Massachusetts Health Care System \(March 2025\)](#) (chiamass.gov)
8. **Data release:** Annually.
9. **Validator & source:** N/A.

Notes: Analysis represents nearly 100% of Massachusetts residents with private commercial insurance, 93.4% of MassHealth members, and 30.3% of Medicare members. Spending for MassHealth members with FFS coverage and Medicare beneficiaries with Original Medicare are not included in these results. For commercial partial-claim data where payers reported behavioral health and pharmacy carve-outs, CHIA estimated spending by service type. MassHealth included facility claims in primary care definition for CY 2022 and CY 2023. Due to payer exclusions from prior years, data may not tie to previously published data points. Data does not reflect aggregate statewide spending, and findings should not be extrapolated for that purpose. MH and SUD diagnoses are not mutually exclusive. Totals may not sum due to rounding.

Had a visit for Behavioral Health, Mental Health, or Substance Use Disorder in the Past 12 Months

Year	Behavioral Health	Mental Health	SUD
2021	18.0%	17.5%	1.5%
2023	21.6%	21.4%	1.1%

1. **Date:** 7/2/2024
2. **Data years:** Calendar years 2021 and 2023. Data was collected in 2022 and 2024, respectively.
3. **Description of metric:** Percentage of Massachusetts residents who had a visit for mental health or substance use disorder in the past 12 months.
4. **Numerator & exclusions:** Massachusetts residents survey respondents who indicated they had a visit for behavioral health, mental health, or substance use disorder in the past 12 months. In this data, behavioral health is defined by the categories of both mental health and substance use disorder services.
5. **Denominator & exclusions:** All Massachusetts resident survey respondents.
6. **Stratifier(s):** N/A.
7. **Data source:** The Center for Health Information and Analysis (CHIA) 2023 Massachusetts Health Insurance Survey. [Massachusetts Health Insurance Survey \(chiamass.gov\)](https://chiamass.gov)
8. **Data release:** Biennial.
9. **Validator & source:** N/A.

Notes: Visits for behavioral health include visits to a mental health professional and visits for alcohol or substance use care or treatment, including visits provided via telehealth. Questions about mental health were reported of residents 1 year old or older in 2019 and 2021, and were reported of residents 5 years old or older in 2023. Questions about alcohol and substance use care and treatment were reported of residents 11 years or older in 2019, 2021, and 2023. Estimates for which the sample size is less than 50 respondents are not reported.

Most recent emergency department (ED) visit in the Past 12 Months was for a condition related to Behavioral Health, Mental Health, or Substance Use Disorder

Year	Behavioral Health	Mental Health	SUD
2021	7.5%	6.0%	2.1%
2023	4.8%	4.5%	0.7%

1. **Date:** 7/2/2024
2. **Data years:** Calendar years 2021 and 2023. Data was collected in 2022 and 2024, respectively.
3. **Description of metric:** Percentage of Massachusetts residents who reported that their most recent emergency department (ED) visit was related to mental health or substance use disorders.
4. **Numerator & exclusions:** Massachusetts residents who reported that their most recent emergency department (ED) visit was related to mental health or substance use disorders. In this data, behavioral health is defined by the categories of both mental health and substance use disorder services.
5. **Denominator & exclusions:** All survey respondents.
6. **Stratifier(s):** N/A.
7. **Data source:** The Center for Health Information and Analysis (CHIA) 2023 Massachusetts Health Insurance Survey. [Massachusetts Health Insurance Survey \(chiamass.gov\)](https://chiamass.gov)
8. **Data release:** Biennial.
9. **Validator & source:** N/A.

Notes: Questions about mental health were reported of residents 1 year old or older in 2021 and were reported of residents 5 years old or older in 2023. Questions about alcohol and substance use care and treatment were reported of residents 11 years or older in 2021 and 2023. Estimates for which the sample size is less than 50 respondents are not reported.

Suicide deaths per 100,000 population, Massachusetts

Year	Suicide deaths per 100,000 (age-adjusted)
2021	8.0
2022	8.3
2023	8.6

1. **Date:** 4/22/2025
2. **Data years:** Calendar year 2021, 2022 and 2023.
3. **Description of metric:** Number of suicide deaths per 100,000 Massachusetts residents ([age-adjusted](#)).
4. **Numerator & exclusions:** Suicides in Massachusetts.
5. **Denominator & exclusions:** Massachusetts total population.
6. **Stratifier(s):** N/A.
7. **Data source:** CDC National Center for Health Statistics. <https://www.cdc.gov/suicide/facts/rates-by-state.html>
8. **Data release:** Annually.
9. **Validator & source:** Suicide rate nationally in 2022 was 14.2 per 100,000. CDC National Center for Health Statistics. <https://www.cdc.gov/mmwr/volumes/73/wr/mm7337e1.htm>

Drug Overdose Deaths per 100,000 population, Massachusetts

Year	Drug Overdose deaths per 100,000 (age-adjusted)
2021	36.8
2022	37.4

1. **Date:** 3/11/2025
2. **Data years:** Calendar years 2021 and 2022.
3. **Description of metric:** Number of drug overdose deaths per 100,000 Massachusetts residents (age-adjusted).
4. **Numerator & exclusions:** Deaths caused by drug overdose in Massachusetts.
5. **Denominator & exclusions:** Massachusetts total population.
6. **Stratifier(s):** N/A.
7. **Data source:** CDC National Center for Health Statistics. [Drug Overdose Mortality by State \(cdc.gov\)](#)
8. **Data release:** Annually.
9. **Validator & source:** Drug overdose death rate nationally in 2022 was 32.6 per 100,000. CDC National Center for Health Statistics. <https://www.cdc.gov/nchs/data/databriefs/db491.pdf>

Alcohol-Related Deaths per 100,000 population, Massachusetts

Year	Alcohol-related deaths per 100,000 (age-adjusted)
2021	12.5
2022	11.8
2023	10.7

1. **Date:** 4/11/2025
2. **Data years:** Calendar years 2021, 2022 and 2023.
3. **Description of metric:** The number of alcohol-related deaths per 100,000 Massachusetts residents (age-adjusted).
4. **Numerator & exclusions:** Deaths related to alcohol in Massachusetts.
5. **Denominator & exclusions:** Massachusetts total population.
6. **Stratifier(s):** N/A.
7. **Data source:** The Commonwealth Fund. [Alcohol-Related Deaths per 100,000 Population | Commonwealth Fund](#)

Tobacco and Heavy Alcohol Use among Massachusetts adults

Year	Current Smoker	Heavy Drinking
2021	10.6%	6.3%
2022	10.4%	6.7%
2023	9.8%	6.4%

1. **Date:** 3/11/2025
2. **Data years:** Calendar years 2021, 2022, and 2023. Data was collected in 2022, 2023 and 2024, respectively.
3. **Description of metric:** Percentage of Massachusetts adults who reported regular tobacco use and/or heavy drinking.
4. **Numerator & exclusions:** Behavioral Risk Factor Surveillance System (BRFSS) survey respondents who indicated they are a current smoker or indicated they are a heavy drinker. A current smoker was defined as someone who has smoked at least 100 cigarettes in their lifetime and who currently smokes either some days or every day. A drink of alcohol was defined as a twelve ounce can or bottle of beer, one five-ounce glass of wine, or one drink with one shot of liquor. Heavy drinking was defined as consumption of more than 14 drinks/week in the past month for men and consumption of more than 7 drinks/week in the past month for women.
5. **Denominator & exclusions:** All BRFSS survey respondents.
6. **Stratifier(s):** N/A.

Access Domain

Any Individual Unmet Need for Behavioral Health Care in the Past 12 Months Because of the Cost of Care

Year	Mental Health	SUD	Behavioral Health
2021	4.7%	1.0%	5.0%
2023	4.6%	1.1%	5.1%

1. **Date:** 7/1/2024
2. **Data years:** Calendar years 2021 and 2023. Data was collected in 2022 and 2024, respectively.
3. **Description of metric:** Percentage of Massachusetts residents who reported they did not receive needed behavioral health care in the past 12 months because of cost.

In this data, behavioral health is defined by the categories of both mental health and substance use disorder services.
4. **Numerator & exclusions:** Respondents who indicated that they had a need for behavioral health care that went unmet in the past 12 months because of the cost of care. In this data, behavioral health is defined by the categories of both mental health and substance use disorder services.
5. **Denominator & exclusions:** All survey respondents.
6. **Stratifier(s):** N/A.
7. **Data source:** The Center for Health Information and Analysis (CHIA) 2023 Massachusetts Health Insurance Survey. [Massachusetts Health Insurance Survey \(chiamass.gov\)](https://chiamass.gov)
8. **Data release:** Biennial.
9. **Validator & source:** N/A.

Notes: Questions about mental health were reported of residents 1 year old or older in 2021 and were reported of residents 5 years old or older in 2023. Questions about alcohol and substance use care and treatment were reported of residents 11 years or older in 2021 and 2023. Estimates for which the sample size is less than 50 respondents are not reported.

Any Family Unmet Need for Behavioral Health Care in the Past 12 Months Because of the Cost of Care

Year	Mental Health	SUD	Behavioral Health
2021	8.3%	1.3%	8.6%
2023	8.2%	1.7%	8.8%

1. **Date:** 7/1/2024
2. **Data years:** Calendar years 2021 and 2023. Data was collected in 2022 and 2024, respectively.
3. **Description of metric:** Percentage of Massachusetts families who reported they did not receive needed behavioral health care in the past 12 months because of cost.
4. **Numerator & exclusions:** Respondents who indicated their families had a need for behavioral health care go unmet in the past 12 months because of the cost of care. In this data, behavioral health is defined by the categories of both mental health and substance use disorder services.
5. **Denominator & exclusions:** All survey respondents.
6. **Stratifier(s):** N/A.
7. **Data source:** The Center for Health Information and Analysis (CHIA) 2023 Massachusetts Health Insurance Survey. [Massachusetts Health Insurance Survey \(chiamass.gov\)](https://chiamass.gov)
8. **Data release:** Biennial.
9. **Validator & source:** N/A.

Notes: Estimates for which the sample size is less than 50 respondents are not reported.

Percent of Behavioral Health-Related Emergency Department Visits Resulting in Excess Length of Stay

Year	% of BH visits that resulted in a length of stay >12 hours	% of BH visits that resulted in a length of stay >24 hours
2021	31.7%	16.0%
2022	33.3%	17.4%
2023*	31.2%	14.6%

1. **Date:** 4/14/2025
2. **Data years:** Calendar years 2021, 2022, and 2023.
3. **Description of metric:** Percentage of behavioral health-related emergency department visits in Massachusetts that resulted in a length of stay exceeding 12 and 24 hours.
4. **Numerator & exclusions:** Behavioral health-related emergency department visits, including treat-and-release visits or visits resulting in neither an inpatient admission nor observation stay, at all acute care hospitals in the Commonwealth with a length of stay greater than 12 or 24 hours. Length of stay (LOS) was calculated by subtracting the arrival date and time from the departure date and time and is reported in hours. Excess LOS (ELOS) was calculated by subtracting 12 or 24 from the calculated LOS; visits with a remaining LOS greater than 0 were considered to have ELOS. Visits with missing LOS were also missing ELOS.
 - a. For this analysis, visits were categorized into clinically meaningful independent behavioral health categories based on the listed principal diagnosis code using the CCSR categories for ICD-10-CM diagnoses defined by AHRQ as related to mental and behavioral disorders [1]. A visit may be associated with more than one behavioral health category because ICD-10-CM diagnoses may be associated with more than one CCSR category.
5. **Denominator & exclusions:** All behavioral health-related emergency department visits, including treat-and-release or visits resulting in neither an inpatient admission nor observation stay, at all acute care hospitals in the Commonwealth.
 - a. Three outlier months were removed when calculating the length of stay including January 2022 at Sturdy Memorial Hospital, May 2023 at Metrowest Hospital, and May 2023 at Saint Vincent's Hospital. The number of visits with missing length of stay due to missing date and/or time of arrival or departure, or invalid data, was 498 in FFY 2021, 31186 in FFY 2022, 131 in Q1 of FFY 2023, 572, in Q2 of FFY 2023, 707 in Q3 of FFY 2023, and 329 in Q4 of 2023. Exclusions due to invalid data included:
 - i. Twelve hospital-quarters with 90% or more departure times equal to zero.
 - ii. Twenty-four hospital-quarters with 100% of visits with arrival time exactly equal to departure time.
6. **Stratifier(s):** N/A.

7. **Data source:** Massachusetts Acute Hospital Case Mix Hospital Emergency Department Databases, October 2018-December 2023. [Reports on Massachusetts Acute Hospital Case Mix Database \(chiamass.gov\)](https://chiamass.gov)
8. **Data release:** Data is released quarterly.
9. **Validator & source:** N/A.

*Data from October 1 – December 31, 2023, is preliminary and subject to change, pending the release and analysis of final data. All other data presented is considered final.

[1] Clinical Classifications Software Refined (CCSR) for ICD-10-CM. October 2022. Healthcare Cost and Utilization Project (HCUP). Agency for Healthcare Research and Quality, Rockville, MD. Available from <https://www.hcupus.ahrq.gov/toolssoftware/ccsr/dxccsr.jsp>

Notes: This metric was previously named 'Behavioral Health-Related Emergency Visits Resulting in Boarding' in the 2024 Behavioral Health Dashboard.

Finance Domain

Behavioral Health Spending as a Percent of Total Health Care Spending

Insurance Category	Year	Total Spending	% of Total Spending
Commercial	2022	\$1,935,856,903	7.7%
	2023	\$2,121,782,359	7.8%
MassHealth	2022	\$2,151,725,888	21.7%
	2023	\$2,484,815,540	22.4%
Medicare Advantage	2022	\$108,261,301	2.4%
	2023	\$117,623,244	2.3%

1. **Date:** 3/11/2025
2. **Data years:** Calendar Year (CY) 2022 and CY 2023, data collected 2024.
3. **Description of metric:** Percentage of behavioral health spending over all healthcare spending by insurance category. Behavioral health spending as a proportion of total spending is calculated by the Center for Health Information and Analysis's (CHIA) Primary Care and Behavioral Health data collection from Massachusetts payers. Insurance categories include Commercial, MassHealth, and Medicare Advantage.

In this data, Behavioral Health is defined by the following categories of both mental health and substance use disorder services:

- **MH Inpatient:** All payments made for claims associated with services provided at an acute or nonacute inpatient facility with a mental health principal diagnosis.
- **MH Emergency Department and Observation:** All payments made for emergency or observation services in an acute or non-acute facility for claims with a mental health or SUD principal diagnosis.
- **MH Outpatient: Primary Care Provider:** Payments for outpatient MH face-to-face and telehealth services, including evaluation and management and integrated mental health primary care services, with a mental health nor SUD diagnosis and delivered by a primary care provider.
- **MH Outpatient: Non-Primary Care Provider:** Payments for outpatient MH specific services, including evaluation and management, intensive outpatient services, and other diversionary care and residential treatment with a mental health or SUD principal diagnosis, not included in Emergency Department and Observation and delivered by any provider type except primary care. Ancillary services should be excluded.
- **MH Prescription Drugs:** All payments made for prescription drugs prescribed to address mental health and SUD needs, based on the specified set of National Drug Codes (NDC).
- **SUD Inpatient:** All payments made for claims associated with services provided at an acute or non-acute inpatient facility with a SUD principal diagnosis.
- **SUD Emergency Department and Observation:** All payments made for emergency or observation services in an acute or nonacute facility for claims with a SUD principal diagnosis.

- **SUD Outpatient: Primary Care Provider:** Payments for certain outpatient face-to-face and telehealth services, including evaluation and management and integrated SUD primary care services, with a SUD diagnosis and delivered by a primary care provider. Ancillary services should not be included.
 - **SUD Outpatient: Non-Primary Care Provider:** Payments for SUD specific services, including evaluation and management, intensive outpatient services, medication assisted treatment, and other diversionary care and residential treatment with a SUD principal diagnosis, not included in SUD Emergency Department and Observation and delivered by any provider type except primary care. This category excludes care classified as SUD Emergency Department and Observation and SUD Primary Care. Ancillary services should not be included.
 - **SUD Prescription Drugs:** All payments made for prescription drugs prescribed to address SUD needs, based on the specified set of National Drug Codes (NDC).
4. **Numerator & exclusions:** Behavioral health spending. Total spending is collected through the sum of mental health and substance use disorder (SUD) spending.
 5. **Denominator & exclusions:** Total healthcare spending.
 6. **Stratifier(s):** Insurance category.
 7. **Data source:** The Center for Health Information and Analysis (CHIA) Massachusetts Annual Report 2025.
 8. **Data release:** Annually.
 9. **Validator & source:** N/A.

Notes: Analysis represents nearly 100% of Massachusetts residents with private commercial insurance, 93.4% of MassHealth members, and 30.3% of Medicare members. Spending for MassHealth members with FFS coverage and Medicare beneficiaries with Original Medicare are not included in these results. For commercial partial-claim data where payers reported behavioral health and pharmacy carve-outs, CHIA estimated spending by service type. MassHealth included facility claims in primary care definition for CY 2022 and CY 2023. Due to payer exclusions from prior years, data may not tie to previously published data points. Data does not reflect aggregate statewide spending, and findings should not be extrapolated for that purpose. MH and SUD diagnoses are not mutually exclusive. Totals may not sum due to rounding.

Percent of individuals that paid entire cost of most recent Mental Health visit out of pocket

Statewide	Percent
2023	15.0%

1. **Date:** 7/10/2024
2. **Data years:** Calendar year 2023. Data was collected in 2024.
3. **Description of metric:** Percentage of individuals who paid the entire cost of their most recent mental health visit out of pocket.
4. **Numerator & exclusions:** Survey respondents who indicated they paid the entire cost of their most recent mental health visit out of pocket.
5. **Denominator & exclusions:** All survey respondents.
6. **Stratifier(s):** Statewide.
7. **Data source:** The Center for Health Information and Analysis (CHIA) 2023 Massachusetts Health Insurance Survey. [Massachusetts Health Insurance Survey \(chiamass.gov\)](https://chiamass.gov)
8. **Data release:** Biennial.
9. **Validator & source:** N/A.

Notes: Mental health care out-of-pocket costs is a new metric to the 2023 MHIS survey, and will only be populated for data year 2023. Categories listed for this measure are not mutually exclusive. Residents were asked to select all applicable options. Questions about mental health were asked of residents 5 years old and older. Because alcohol and substance use disorder reporting is low, this graph is for mental health only.

Member Cost Sharing for Mental Health and SUD Visits

		Member Cost-Share % of Total	
Insurance Category	Year	Mental Health	SUD
Commercial Full Claims	2022	18.2%	10.2%
	2023	16.5%	9.6%
Medicare Advantage	2022	14.0%	11.0%
	2023	11.5%	9.3%

1. **Date:** 3/11/2025
2. **Data years:** Calendar Year (CY) 2022 and CY 2023, data collected 2024.
3. **Description of metric:** Member cost sharing for those with a mental health and substance use disorder (SUD) principal diagnosis.
4. **Numerator & exclusions:** Mental health and SUD member cost-sharing expenditures.
5. **Denominator & exclusions:** Total member cost-sharing expenditures. This reflects payments made for covered health care services, in which the member is financially responsible for such as copayments, coinsurance, and deductibles.
6. **Stratifier(s):** Insurance category.
7. **Data source:** The Center for Health Information and Analysis (CHIA)
8. **Data release:** Annually.
9. **Validator & source:** N/A.

Notes: Analysis represents commercial full-claims data reported by commercial payers that submitted CY 2022 and CY 2023 data representing approximately 64% of the commercial market, 93.4% of MassHealth members, and nearly 30.3% of Medicare members. Spending for MassHealth members with FFS coverage and Medicare beneficiaries with Original Medicare are not included in these results. For commercial partial-claim data where payers reported behavioral health and pharmacy carve-outs, CHIA estimated spending by service type. MassHealth included facility claims in primary care definition for CY 2022 and CY 2023. Due to payer exclusions from prior years, data may not tie to previously published data points. Data does not reflect aggregate statewide spending, and findings should not be extrapolated for that purpose. MH and SUD diagnosis are not mutually exclusive. Totals may not sum due to rounding.

Behavioral Health Inpatient Spending as a Percent of Total Behavioral Health Spending

Insurance Category	Year	Total Spending	% of Total Spending
Commercial	2022	\$373,702,046	19.3%
	2023	\$389,464,039	18.4%
MassHealth	2022	\$493,620,052	22.9%
	2023	\$603,581,015	24.3%
Medicare Advantage	2022	\$29,620,816	27.4%
	2023	\$30,739,983	26.1%

1. **Date:** 3/11/2025
2. **Data years:** Calendar Year (CY) 2022 and CY 2023, data collected 2024.
3. **Description of metric:** Percentage of inpatient behavioral health spending over all behavioral health spending by insurance category. Behavioral health spending as a proportion of total spending is calculated by the Center for Health Information and Analysis's (CHIA) Primary Care and Behavioral Health data collection from Massachusetts payers. Insurance categories include Commercial, MassHealth, and Medicare Advantage.

In this data, Behavioral Health is defined by the following categories of both mental health and substance use disorder services:

- **MH Inpatient:** All payments made for claims associated with services provided at an acute or nonacute inpatient facility with a mental health principal diagnosis.
 - **SUD Inpatient:** All payments made for claims associated with services provided at an acute or non-acute inpatient facility with a SUD principal diagnosis.
4. **Numerator & exclusions:** Mental health and SUD inpatient behavioral health spending.
 5. **Denominator & exclusions:** Behavioral health spending. Spending is collected through the sum of mental health and substance use disorder (SUD) spending.
 5. **Stratifier(s):** Insurance category.
 6. **Data source:** The Center for Health Information and Analysis (CHIA) Massachusetts Annual Report 2025.
 7. **Data release:** Annually.
 8. **Validator & source:** N/A.

Notes: Analysis represents nearly 100% of Massachusetts residents with private commercial insurance, 93.4% of MassHealth members, and 30.3% of Medicare members. Spending for MassHealth members with FFS coverage and Medicare beneficiaries with Original Medicare are not included in these results. For commercial partial-claim data where payers reported behavioral health and pharmacy carve-outs, CHIA estimated spending by service type. MassHealth included facility claims in primary care definition for CY 2022 and CY 2023. Due to payer exclusions from prior years, data may not tie to previously published data points. Data does not reflect aggregate statewide spending, and findings should not be extrapolated for that purpose. MH and SUD diagnoses are not mutually exclusive. Totals may not sum due to rounding.

Behavioral Health Outpatient Spending as a Percent of Total Behavioral Health Spending

Insurance Category	Year	Total Spending	% of Total Spending
Commercial	2022	\$1,158,360,521	59.8%
	2023	\$1,312,520,989	61.9%
MassHealth	2022	\$1,129,574,569	52.5%
	2023	\$1,351,653,849	54.4%
Medicare Advantage	2022	\$27,349,440	25.3%
	2023	\$30,738,949	26.1%

1. **Date:** 3/11/2025
2. **Data years:** Calendar Year (CY) 2022 and CY 2023, data collected 2024.
3. **Description of metric:** Percentage of behavioral health outpatient spending over all behavioral health spending by insurance category. Behavioral health spending as a proportion of total spending is calculated by the Center for Health Information and Analysis's (CHIA) Primary Care and Behavioral Health data collection from Massachusetts payers. Insurance categories include Commercial, MassHealth, and Medicare Advantage.

In this data, Behavioral Health is defined by the following categories of both mental health and substance use disorder services:

- **MH Outpatient: Primary Care Provider:** Payments for outpatient MH face-to-face and telehealth services, including evaluation and management and integrated mental health primary care services, with a mental health nor SUD diagnosis and delivered by a primary care provider.
- **MH Outpatient: Non-Primary Care Provider:** Payments for outpatient MH specific services, including evaluation and management, intensive outpatient services, and other diversionary care and residential treatment with a mental health or SUD principal diagnosis, not included in Emergency Department and Observation and delivered by any provider type except primary care. Ancillary services should be excluded.
- **SUD Outpatient: Primary Care Provider:** Payments for certain outpatient face-to-face and telehealth services, including evaluation and management and integrated SUD primary care services, with a SUD diagnosis and delivered by a primary care provider. Ancillary services should not be included.
- **SUD Outpatient: Non-Primary Care Provider:** Payments for SUD specific services, including evaluation and management, intensive outpatient services, medication assisted treatment, and other diversionary care and residential treatment with a SUD principal diagnosis, not included in SUD Emergency Department and Observation and delivered by any provider type except primary care. This category excludes care classified as SUD Emergency Department and Observation and SUD Primary Care. Ancillary services should not be included.

4. **Numerator & exclusions:** Total Mental Health and SUD primary care provider and non-primary care provider outpatient behavioral health spending.
5. **Denominator & exclusions:** Behavioral health spending. Spending is collected through the sum of mental health and substance use disorder (SUD) spending.
6. **Stratifier(s):** Insurance category.
7. **Data source:** The Center for Health Information and Analysis (CHIA) Massachusetts Annual Report 2025.
8. **Data release:** Annually.
9. **Validator & source:** N/A.

Notes: Analysis represents nearly 100% of Massachusetts residents with private commercial insurance, 93.4% of MassHealth members, and 30.3% of Medicare members. Spending for MassHealth members with FFS coverage and Medicare beneficiaries with Original Medicare are not included in these results. For commercial partial-claim data where payers reported behavioral health and pharmacy carve-outs, CHIA estimated spending by service type. MassHealth included facility claims in primary care definition for CY 2022 and CY 2023. Due to payer exclusions from prior years, data may not tie to previously published data points. Data does not reflect aggregate statewide spending, and findings should not be extrapolated for that purpose. MH and SUD diagnoses are not mutually exclusive. Totals may not sum due to rounding.

Behavioral Health Emergency Department Observation as a Percent of Total Behavioral Health Spending

Insurance Category	Year	Total Spending	% of Total Spending
Commercial	2022	\$65,669,271	3.4%
	2023	\$63,064,954	3.0%
MassHealth	2022	\$49,144,339	2.3%
	2023	\$63,141,662	2.5%
Medicare Advantage	2022	\$5,123,459	4.7%
	2023	\$5,124,030	4.4%

1. **Date:** 3/11/2025
2. **Data years:** Calendar Year (CY) 2022 and CY 2023, data collected 2024.
3. **Description of metric:** Percentage of emergency department behavioral health spending over all behavioral health spending by insurance category. Behavioral health spending as a proportion of total spending is calculated by the Center for Health Information and Analysis's (CHIA) Primary Care and Behavioral Health data collection from Massachusetts payers. Insurance categories include Commercial, MassHealth, and Medicare Advantage.

In this data, Behavioral Health Emergency Department Observation is defined by the following categories of both mental health and substance use disorder services:

- **MH Emergency Department and Observation:** All payments made for emergency or observation services in an acute or non-acute facility for claims with a mental health or SUD principal diagnosis.
 - **SUD Emergency Department and Observation:** All payments made for emergency or observation services in an acute or nonacute facility for claims with a SUD principal diagnosis.
4. **Numerator & exclusions:** Mental health and SUD emergency department and observation behavioral health spending.
 5. **Denominator & exclusions:** Behavioral health spending. Spending is collected through the sum of mental health and substance use disorder (SUD) spending.
 6. **Stratifier(s):** Insurance category.
 7. **Data source:** The Center for Health Information and Analysis (CHIA) Massachusetts Annual Report 2025.
 8. **Data release:** Annually.
 9. **Validator & source:** N/A.

Notes: Analysis represents nearly 100% of Massachusetts residents with private commercial insurance, 93.4% of MassHealth members, and 30.3% of Medicare members. Spending for MassHealth members with FFS coverage and Medicare beneficiaries with Original Medicare are not included in these results. For commercial partial-claim data

where payers reported behavioral health and pharmacy carve-outs, CHIA estimated spending by service type. MassHealth included facility claims in primary care definition for CY 2022 and CY 2023. Due to payer exclusions from prior years, data may not tie to previously published data points. Data does not reflect aggregate statewide spending, and findings should not be extrapolated for that purpose. MH and SUD diagnoses are not mutually exclusive. Totals may not sum due to rounding.

Behavioral Health Prescription Drug Spending as a Percent of Total Behavioral Health Spending

Insurance Category	Year	Total Spending	% of Total Spending
Commercial	2022	\$337,345,169	17.4%
	2023	\$356,596,394	16.8%
MassHealth	2022	\$467,799,860	21.7%
	2023	\$458,530,785	18.5%
Medicare Advantage	2022	\$46,006,091	42.5%
	2023	\$50,739,994	43.1%

1. **Date:** 3/11/2025
2. **Data years:** Calendar Year (CY) 2022 and CY 2023, data collected 2024.
3. **Description of metric:** Percentage of prescription drug behavioral health spending over all behavioral health spending by insurance category. Behavioral health spending as a proportion of total spending is calculated by the Center for Health Information and Analysis's (CHIA) Primary Care and Behavioral Health data collection from Massachusetts payers. Insurance categories include Commercial, MassHealth, and Medicare Advantage.

In this data, Behavioral Health is defined by the following categories of both mental health and substance use disorder services:

- **MH Prescription Drugs:** All payments made for prescription drugs prescribed to address MH needs, based on the specified set of National Drug Codes (NDC).
 - **SUD Prescription Drugs:** All payments made for prescription drugs prescribed to address SUD needs, based on the specified set of National Drug Codes (NDC).
4. **Numerator & exclusions:** Mental health and SUD prescription drug spending.
 5. **Denominator & exclusions:** Behavioral health spending. Spending is collected through the sum of mental health and substance use disorder (SUD) spending.
 5. **Stratifier(s):** Insurance category.
 6. **Data source:** The Center for Health Information and Analysis (CHIA) Massachusetts Annual Report 2025.
 7. **Data release:** Annually.
 8. **Validator & source:** N/A.

Notes: Analysis represents nearly 100% of Massachusetts residents with private commercial insurance, 93.4% of MassHealth members, and 30.3% of Medicare members. Spending for MassHealth members with FFS coverage and Medicare beneficiaries with Original Medicare are not included in these results. For commercial partial-claim data where payers reported behavioral health and pharmacy carve-outs, CHIA estimated spending by service type. MassHealth included facility claims in primary care definition for CY 2022 and CY 2023. Due to payer exclusions from prior years, data may not tie to previously published data points. Data does not reflect aggregate statewide spending, and findings should not be extrapolated for that purpose. MH and SUD diagnoses are not mutually exclusive. Totals may not sum due to rounding.

Utilization Domain

Behavioral Health Related Hospital Inpatient Discharges

Year	Discharges
2021	283,537
2022	269,616
2023*	277,777

1. **Date:** 4/14/2025
2. **Data years:** Calendar years 2021, 2022 and 2023.
3. **Description of metric:** Number of inpatient discharges from acute hospitals associated with any behavioral health condition. For this analysis, discharges were categorized into clinically meaningful independent behavioral health categories based on the listed primary and secondary diagnosis codes using the CCSR categories for ICD-10-CM diagnoses as related to behavioral health. A discharge may be associated with more than one behavioral health category because all primary and secondary diagnoses on the discharge record were considered and because ICD-10-CM diagnoses may be associated with more than one CCSR category. Discharges were classified into mutually exclusive groups: one or more mental health conditions associated with the discharge, but no substance use disorder, one or more substance use disorders associated with the discharge but no mental health condition, and co-occurring mental health and substance use conditions. See technical appendix for more information and detailed behavioral health category definitions.
4. **Numerator & exclusions:** Inpatient discharges with a behavioral health condition present.
5. **Denominator & exclusions:** Total inpatient discharges. Due to small numbers of discharges for several months (<11 discharges), two hospitals, Shriners Hospital for Children – Boston and Springfield, were excluded. 22 discharges in FFY 2021 from temporary COVID-19 field hospitals were also excluded.
6. **Stratifier(s):** N/A.
7. **Data source:** Massachusetts Acute Care Hospital Inpatient Discharge Reporting. [Massachusetts Acute Care Hospital Inpatient Discharge Reporting \(chiamass.gov\)](https://chiamass.gov)
8. **Data release:** Data is updated and released quarterly.
9. **Validator & source:** N/A.

*Data from October 1 – December 31, 2023, is preliminary and subject to change, pending the release and analysis of final data. All other data presented is considered final.

Behavioral Health-Related Length of Stay at Acute Hospitals

Year	Average length of stay at acute hospitals
2021	6.62 days
2022	7.15 days
2023*	7.05 days

1. **Date:** 4/14/2025
2. **Data years:** Calendar years 2021, 2022, and 2023.
3. **Description of metric:** Average length of stay at acute hospitals for inpatient discharges associated with any behavioral health condition. Length of stay (LOS) was calculated by subtracting the admission date from the discharge date. Stays for which the admission and discharge dates were the same would be coded as having a length of stay of 0 days. Average length of stay (ALOS) is an aggregate measure of the mean LOS within a certain category or group. Inpatient days is an aggregate measure of the sum of the LOS, or the days of care associated with a discharge within a category or group. No outliers were removed when calculating the length of stay. The number of discharges with missing length of stay due to missing date of admission or discharge was 8 in FFY 2021, 7 in FFY 2022, 8 in FFY 2023 and 9 in FFY 2024.
4. **Numerator & exclusions:** N/A.
6. **Denominator & exclusions:** Due to small numbers of discharges for several months (<11 discharges), two hospitals, Shriners Hospital for Children – Boston and Springfield, were excluded. 22 discharges in FFY 2021 from temporary COVID-19 field hospitals were also excluded.
6. **Stratifier(s):** N/A.
7. **Data source:** Massachusetts Acute Care Hospital Inpatient Discharge Reporting. [Massachusetts Acute Care Hospital Inpatient Discharge Reporting \(chiamass.gov\)](https://chiamass.gov)
8. **Data release:** Data is updated and released quarterly.
9. **Validator & source:** N/A.

*Data from October 1 – December 31, 2023, is preliminary and subject to change, pending the release and analysis of final data. All other data presented is considered final.

Behavioral Health Emergency Department Visits at Acute Care Hospitals, per 100,000 population

Year	ED Visits per 100,000
2021	2,244
2022	2,072
2023*	1,866

1. **Date:** 03/19/2025
2. **Data years:** FY 2021, 2022, and 2023; Calendar years 2021, 2022, and 2023. Data updated 2024.
3. **Description of metric:** Emergency department visits associated with a primary behavioral health diagnosis.
4. **Numerator & exclusions:** Visits were categorized into clinical meaningful independent behavioral health categories based on the listed principal diagnosis code using the CCSR categories for ICD-10-CM diagnoses defined by AHRQ as related to mental and behavioral disorders [1]. A visit may be associated with more than one behavioral health category because ICD-10-CM diagnoses may be associated with more than one CCSR category.
5. **Denominator & exclusions:** Analysis was restricted to MA residents.
6. **Stratifier(s):** N/A.
7. **Data source:** Massachusetts Acute Care Hospital Emergency Department Reporting. [Massachusetts Acute Care Hospital Emergency Department Reporting \(chiamass.gov\)](https://chiamass.gov). Population denominators from the American Community Survey 5-year data tables.

9. **Validator & source:** N/A.

*Data from October 1 – December 31, 2023, is preliminary and subject to change, pending the release and analysis of final data. All other data presented is considered final.

Opioid-Related Emergency Department Visits

Year	ED Visits per 100,000
2021	209
2022	178
2023*	156

1. **Date:** 3/19/2025
2. **Data years:** Calendar years 2021, 2022, and 2023. Data updated 2024.
3. **Description of metric:** Opioid-related emergency department visits with an opioid-related primary diagnosis code.
4. **Numerator & exclusions:** The following ICD-10-CM codes were used to identify opioid-related visits:
 - b. F11 series: Opioid-related disorders
 - i. All codes are included except F11.11, F11.21, and F11.91
 - b. T40 series: Poisoning by, adverse effect of, and underdosing of narcotics
 - c. Codes with a sixth digit of "6", indicating underdosing, are excluded
5. **Denominator & exclusions:** Analysis was restricted to MA residents.
6. **Stratifier(s):** N/A
7. **Data source:** Massachusetts Acute Care Hospital Emergency Department Reporting. [Massachusetts Acute Care Hospital Emergency Department Reporting \(chiamass.gov\)](https://chiamass.gov). Population denominators from the American Community Survey 5-year data tables.

Psychotherapy Utilization per 1,000 commercially insured members, by age group

Year	Age Group	Visits per 1,000
2021	Total Population (0-64)	1,941
	0-17	1,390
	18-25	2,846
	26-49	2,459
	50-64	1,300
2022	Total Population (0-64)	1,940
	0-17	1,401
	18-25	2,720
	26-49	2,504
	50-64	1,272

1. **Date:** 3/11/2025
2. **Data year(s):** Calendar Year (CY) 2021 and 2022.
3. **Description of metric:** Number of psychotherapy visits, delivered in-person or via telehealth, for individuals aged 0-64.
4. **Numerator & exclusions:** Psychotherapy visits for individuals ages 0-64 with 12 months of enrollment. Psychotherapy claims were identified using Current Procedural Terminology codes 90832, 90833, 90834, 90836, 90837 and 90838.
 - a. To ensure inclusion of only ambulatory services, inpatient facility claims were excluded for this analysis, as were emergency department, inpatient, and residential sites of service (professional claim site of service codes 13, 14, 21, 23, 31, 33, 34, 51, and 61), as well as facility claims with HCCI outpatient facility category 1 (emergency department).
 - b. Only psychotherapy visits with specific behavioral health diagnoses were included in the analysis.
5. **Denominator & exclusions:** Individuals included were those with 12 full months of behavioral health coverage, as well as enrollment in health insurance with any of the six largest Massachusetts commercial payers: Blue Cross Blue Shield of Massachusetts, Tufts Health Plan, Harvard Pilgrim Health Care, Anthem (including Unicare, an Anthem offering), Health New England, and Mass General Brigham Health Plan (formerly known as AllWays). These six payers represent approximately 37% of the commercial market (including ConnectorCare/subsidized plans) and primarily include claims for members enrolled in fully insured plans.
6. **Stratifier(s):** Age group

Insured Members with at least one Mental Health Prescription

Year	Percent
2021	28.0%
2022	28.6%

1. **Date:** 4/4/2025
2. **Data year(s):** Calendar Year (CY) 2021 and 2022.
3. **Description of metric:** Percentage of commercially insured members in MA aged 12-64 with at least one mental health prescription.
4. **Numerator & exclusions:** Commercially insured members aged 12-64 with 12 months of prescription drug coverage and at least one mental health prescription. Mental health prescriptions were identified using National Drug Codes (NDCs) in CHIA's [Primary Care and Behavioral Health](#) data code list.
5. **Denominator & exclusions** Individuals included were those with 12 full months of prescription drug coverage, as well as enrollment in health insurance with any of the six largest Massachusetts commercial payers: Blue Cross Blue Shield of Massachusetts, Tufts Health Plan, Harvard Pilgrim Health Care, Anthem (including Unicare, an Anthem offering), Health New England, and Mass General Brigham Health Plan (formerly known as AllWays). These six payers represent approximately 37% of the commercial market (including ConnectorCare/subsidized plans) and primarily include claims for members enrolled in fully insured plans.
6. **Stratifier(s):** N/A.

Quality Domain

Behavioral Health Screening in Primary Care

Year	Commercial	MassHealth
2021	71.1	65.2
2022	74.1	66.6
2023	76.2	65.9

1. **Date:** 3/11/2025
2. **Data years:** Measurement year 2021 (reporting year 2022), measurement year 2022 (reporting year 2023), measurement year 2023 (reporting year 2024).
3. **Description of metric:** The Adult Behavioral Health composite score is a validated composite score on a 0-100 scale that is derived from 2 survey items. It captures patient experiences of being screened for depression and anxiety in primary care visits. Higher scores denote better experiences.

The 2022, 2023, and 2024 MassHealth Primary Care Member Experience Surveys for adult members (PC Adult MES) were based on the CG-CAHPS 3.0 survey developed by the National Committee for Quality Assurance (NCQA) and the Agency for Healthcare Research and Quality (AHRQ).

The 2022 PC Adult MES had 57 items. The survey was fielded in February 2022 and sampled 117,455 adult members.

The 2023 PC Adult MES had 57 items. The survey was fielded in May 2023 and sampled 121,352 adult members.

The 2024 PC Adult MES had 50 items. The survey was fielded in April 2024 and sampled 114,276 adult members.

The survey sample was randomly selected from a MassHealth sample frame that contained MassHealth adult members (≥ 18 years old) who were eligible to complete the survey. Eligibility requirements were that the member be actively enrolled in MassHealth, be attributed to an ACO that participated in the MassHealth program and have at least one primary care visit in the last year. Sample sizes were designed to yield a minimum of 400 completed surveys at the ACO level. Survey invitations were sent to members by email, if a member had a valid email address on file with MassHealth. Email invitations had links to online surveys in English, Spanish, Portuguese, Chinese, Haitian Creole, Vietnamese, Russian, Khmer, and Arabic for the 2022 and 2023 surveys. Non-respondents were sent mailings of a survey invitation with an English paper survey and an URL to access online surveys. For members who were on file as being Spanish speakers, mailings also contained a Spanish survey. The response rate for the 2022 adult survey was 10.0%. The response rate for the 2023 adult survey was 8.5%.

Survey item responses were coded to a 0 to 100 scale (No=0; Yes= 100.00) at the respondent level and composites scores were calculated as a simple average of the response values for each of the component questions. Respondent composite scores were averaged at the state level to calculate the state-level composite score. State-level composite scores were not case-mix adjusted.

Adult Behavioral Health Composite items and response options

Adult Behavioral Health Composite	Did anyone in this provider's office ask you if there was a period of time when you felt sad, empty or depressed?	Yes
	Did you and anyone in this provider's office talk about things in your life that worry you or cause you stress?	No

4. **Numerator & exclusions:** N/A.
5. **Denominator & exclusions:** N/A.
6. **Stratifier:** N/A.
7. **Weighting Scheme:** N/A.
8. **Data source & status:** The data sources for the Communication Composite score were the 2022, 2023, and 2024 MassHealth Adult Primary Care Member Experience Surveys.
9. **Data release:** Data is collected annually and released annually, usually in the fall.
10. **Validator & source:** N/A.

Notes: Note that Commercial and MassHealth experience data are not comparable – provider networks, patient populations, and survey instruments are not aligned.

Initiation and Engagement of SUD Treatment

Year	Massachusetts Statewide Rate	
	Initiation	Engagement
2022	38.4% (adj)	12.9% (adj)
2023	36.9% (adj)	12.2% (adj)

1. **Date:** 3/11/2025
2. **Data years:** Healthcare Effectiveness Data and Information Set (HEDIS®) measurement years 2022 and 2023.
3. **Description of metric:** This data assesses new episodes of substance use disorder (SUD) in adults and adolescents 13 years of age and older who received:
 - a. **Initiation of SUD Treatment:** New episodes, after which the individual initiated treatment through an inpatient SUD admission, outpatient visit, telehealth or intensive outpatient encounter or partial hospitalization, or received medication within 14 days of diagnosis.
 - b. **Engagement of SUD Treatment:** New episodes, after which the individual initiated treatment and had two or more additional SUD services or medications within 34 days of the initiation visit.
4. **Numerator & exclusions:** Commercially insured members, adults and adolescents 13 years of age and older who had new episodes of SUD, enrolled in HMO and Point of Service (excluding Marketplace) products in participating health plans (Mass General Brigham Health Plan, Blue Cross Blue Shield of Massachusetts, Point32Health (Harvard Pilgrim Health Care/Tufts Health Plan), and Health New England) and who received initiation of SUD treatment within 14 days and/or engagement of SUD treatment within 34 days.
5. **Denominator & exclusions:** Commercially insured members, adults and adolescents 13 years of age and older who had new episodes of SUD, enrolled in HMO and Point of Service (excluding Marketplace) products in participating health plans (Mass General Brigham Health Plan, Blue Cross Blue Shield of Massachusetts, Point32Health (Harvard Pilgrim Health Care/Tufts Health Plan), and Health New England).
6. **Stratifier(s):** N/A.
7. **Weighting Scheme:** NCQA permits health plans to calculate this measure using either administrative data only, or administrative data combined with medical record review (Hybrid Method). If a health plan chose to report eligible measures to NCQA using the Hybrid Method, the health plan reported the rate for their sample population based on Administrative Data Method and the rate based on the Hybrid Method (combination of administrative data and medical record review data) to MHQP. This enabled MHQP to calculate a “chart adjustment factor,” which represents the increase in a plan’s measured rate after medical record review (i.e., the Hybrid Method rate minus the Administrative Data Method only rate). MHQP adjusted the rates that were obtained for the health plan’s entire HEDIS®-eligible population using the Administrative Data Method by applying the respective chart adjustment factors to each affected measure for the provider site, medical group, or physician network.

-
8. **Data source:** The Center for Health Information and Analysis (CHIA) Massachusetts Annual Report 2025. [Annual Report on the Performance of the Massachusetts Health Care System \(March 2025\) \(chiamass.gov\)](#)
 9. **Data release:** Annually.
 10. **Validator & source:** National Committee for Quality Assurance (NCQA), [HEDIS® Measures and Technical Resources, Initiation and Engagement of Substance Use Disorder Treatment \(IET\)](#): An estimated 36.5% of national resident's adults and adolescents 13 years of age and older under a Commercial HMO plan had received initiation of SUD treatment in 2022. An estimated 13.1% of national resident's adults and adolescents 13 years of age and older under a Commercial HMO plan had received engagement of SUD treatment in 2022.

Metabolic Monitoring for Children and Adolescents on Antipsychotics (APM)

Year	Massachusetts Statewide Rate
2022	42.5% (adj)
2023	42.2% (adj)

1. **Date:** 3/11/2025
2. **Data years:** Healthcare Effectiveness Data and Information Set (HEDIS®) measurement years 2022 and 2023.
3. **Description of metric:** This data assesses the percentage of children and adolescents with ongoing antipsychotic medication use who had metabolic testing during the year.
4. **Numerator & exclusions:** Commercially insured members, children and adolescents with ongoing antipsychotic medication use, enrolled in HMO and Point of Service (excluding Marketplace) products in participating health plans (Mass General Brigham Health Plan, Blue Cross Blue Shield of Massachusetts, Point32Health (Harvard Pilgrim Health Care/Tufts Health Plan), and Health New England) and who had metabolic testing during the year.
5. **Denominator & exclusions:** Commercially insured members, children and adolescents with ongoing antipsychotic medication use, enrolled in HMO and Point of Service (excluding Marketplace) products in participating health plans (Mass General Brigham Health Plan, Blue Cross Blue Shield of Massachusetts, Point32Health (Harvard Pilgrim Health Care/Tufts Health Plan), and Health New England).
6. **Stratifier(s):** N/A.
7. **Weighting Scheme:** NCQA permits health plans to calculate this measure using either administrative data only, or administrative data combined with medical record review (Hybrid Method). If a health plan chose to report eligible measures to NCQA using the Hybrid Method, the health plan reported the rate for their sample population based on Administrative Data Method and the rate based on the Hybrid Method (combination of administrative data and medical record review data) to MHQP. This enabled MHQP to calculate a “chart adjustment factor,” which represents the increase in a plan’s measured rate after medical record review (i.e., the Hybrid Method rate minus the Administrative Data Method only rate). MHQP adjusted the rates that were obtained for the health plan’s entire HEDIS®-eligible population using the Administrative Data Method by applying the respective chart adjustment factors to each affected measure for the provider site, medical group, or physician network.

Equity Domain

Had a visit for Behavioral Health in the past 12 Months

Year	Race and Ethnicity	Percent
2021	White, non-Hispanic	19.8%
	Black, non-Hispanic	9.9%
	Asian, non-Hispanic	10.5%
	Other or multiple races, non-Hispanic	13.4%
	Hispanic	17.4%
	Total Population	18.0%
2023	White, non-Hispanic	21.6%
	Black, non-Hispanic	19.8%
	Asian, non-Hispanic	12.9%
	Other or multiple races, non-Hispanic	32.7%
	Hispanic	22.3%
	Total Population	21.6%

1. **Date:** 7/10/2024
2. **Data years:** Calendar year 2023. Data was collected in 2024.
3. **Description of metric:** Percentage of Massachusetts residents, by race and ethnicity, who had a visit for behavioral health in the past 12 months.
4. **Numerator & exclusions:** Massachusetts residents survey respondents who indicated they had a visit for behavioral health, mental health, or substance use disorder in the past 12 months. In this data, behavioral health is defined by the categories of both mental health and substance use disorder services.
5. **Denominator & exclusions:** All Massachusetts resident survey respondents.
6. **Stratifier(s):** Race and ethnicity.
7. **Data source:** The Center for Health Information and Analysis (CHIA) 2023 Massachusetts Health Insurance Survey. [Massachusetts Health Insurance Survey \(chiamass.gov\)](https://chiamass.gov)
8. **Data release:** Biennial.
9. **Validator & source:** N/A.

Notes: In 2019, "Asian, non-Hispanic" residents were reported as part of "Other or multiple races, non-Hispanic" group. Visits for behavioral health include visits to a mental health professional and visits for alcohol or substance use care or treatment, including visits provided via telehealth. Questions about mental health were reported of residents 1 year old or older in 2019 and 2021, and were reported of residents 5 years old or older in 2023. Questions about alcohol and substance use care and treatment were reported of residents 11 years or older in 2019, 2021, and 2023. Estimates for which the sample size is less than 50 respondents are not reported.

Most recent Emergency Department visit was for a condition related to Mental Health or Substance Use Disorder (SUD)

Year	Race/Ethnicity	Percent
2021	White, non-Hispanic	8.1%
	Black, non-Hispanic	3.9%
	Asian, non-Hispanic	***
	Other or multiple races, non-Hispanic	***
	Hispanic	7.2%
	Total Population	7.5%
2023	White, non-Hispanic	5.9%

9. **Validator & source:** N/A

Notes: Mental health care out-of-pocket costs is a new metric to the 2023 MHIS survey and will only be populated for data year 2023. Categories listed for this measure are not mutually exclusive. Residents were asked to select all applicable options. Questions about mental health were asked of residents 5 years old and older. Because alcohol and substance use disorder reporting is low, this graph is for mental health only. *** = Estimates for which the sample size is less than 50 respondents are not reported.
